II REVIEW OF LITERATURE 23-55

References
III OBJECTIVES AND METHODOLOGY 56-74

3.1 Rationale and Justification 56

3.2 Objectives 57

3.3 Research Methodology 57

3.3.1 Agro-Climatic Zones 57

3.3.2 Methodological Considerations 58

3.3.2.1 Quantitative Evaluation Methods 58

3.3.2.1a Before/After study 59

3.3.2.1b With/Without design 60

3.3.2.1c Propensity Score Matching 60

3.3.2.1d Instrumental Variable Method 60

3.3.2.1e Cost-Benefit Analysis 61

3.3.2.2 Qualitative Evaluation Methods 62

3.3.2.3 Mixed Methods Evaluators Design 63

3.3.3 Component Designs 64

3.3.4 Integrated Designs 64

3.3.5 Nature of Data Used 65

3.3.6 Sampling Design 65

3.3.7 Statistical Tools and Techniques Applied 65

3.4 Definitions and Concepts 67

3.5 Limitations of the study 70

IV SOCIO-ECONOMIC CHARACTERISTICS OF SAMPLE HOUSEHOLDS 75-87

4.1 Age and Sex-Wise Family Composition of the Sample Household 75

4.2 Educational Status of the Sample Households 77
6.1.8 Labour Days Utilization in All Horticulture Crops 119

6.1.9 Labour Days Utilization in All Agriculture and Horticulture Crops – A Comparative Analysis 122

6.2 Bullock Pair Labour Days Utilization in Maize, Paddy, Wheat and All Agriculture Crops 124

6.3 Seed Use 126

6.4 Use of Farm Yard Manure 126

6.5 Fertilizer Use 130

6.6 Use of Insecticides and Pesticides 130

6.7 Irrigation and Its Sources 130

6.8 The Use of Farm Implements 132

6.9 Input Use Structure and Total Cost of Cultivation in Different Crops 132

6.9.1 Use of Inputs and Total Cost of Cultivation in Maize Crop 135

6.9.2 Use of Inputs And Total Cost of Cultivation In Paddy Crop 137

6.9.3 Use of Inputs and Total Cost of Cultivation in Wheat Crop 139

6.9.4 Use of Inputs and Total Cost of Cultivation in All Agriculture Crops 140

6.9.5 Use of Inputs and Total Cost of Cultivation in Apple Crop 142

6.9.6 Use of Inputs And Total Cost of Cultivation In Pear Crop 143

6.9.7 Use of Inputs and Total Cost of Cultivation in Cherry Crop 145

6.9.8 Use of Inputs and Total Cost of Cultivation in All Horticulture Crops 147

6.9.9 Break-up of total cost into various concepts - A Comparative Analysis 149
6.10 Gross Returns 151
6.11 Net Returns 152

VII IMPACT OF WATERSHED DEVELOPMENT PROGRAMS ON AGRICULTURE, HORTICULTURE, EMPLOYMENT AND INCOME GENERATION 156-188

7.1 Production Function Analysis (Results and Discussion) 156
7.1.1 Production Elasticities for Maize Crop 158
7.1.2 Returns to Scale for Maize Crop 160
7.1.3 Production Elasticities for Paddy Crop 160
7.1.4 Returns to Scale for Paddy Crop 162
7.1.5 Production Elasticities for Wheat Crop 162
7.1.6 Returns to Scale for Wheat Crop 164
7.1.7 Production Elasticities for Apple Crop 165
7.1.8 Returns to Scale for Apple Crop 167
7.1.9 Production Elasticities for Pear Crop 168
7.1.10 Returns to scale for pear crop 170
7.1.11 Production Elasticities for Cherry Crop 170
7.1.12 Returns to Scale for Cherry Crop 172

7.2 Impact of watershed programme on distribution pattern of livestock 173

7.3 Impact on Pattern of Employment in All Activities 175

7.4 Impact on Extent of Unemployment Among The Sample Households 178
7.4(i) Time Criterion 178
7.4(ii) Willingness Criterion 181
7.5 Impact on Household Farm and Non-Farm Income

IX SUMMARY, CONCLUSIONS AND FUTURE POLICY IMPLICATIONS 211-227

9.1 Summary & Conclusions 211
9.1.1 Research Design 213
9.1.2 Demographic & Socio-economic profile 214
9.1.3 Land use and Cropping Pattern 216
9.1.4 Resource Use Pattern 217
9.1.5 Returns to Scale 220
9.1.6 Impact of Watershed Development on Employment and Income Generation 221
9.1.7 Problems and Prospects 223

9.2 Future Policy Implications 224
