Acknowledgement

Many people made this thesis possible. It has taken the present appropriate shape under the able guidance of Dr. C. S. Sridhar, Reader, Dept. of Electronics, University of Cochin. I am greatly indebted to him for his discussions and recommendations, particularly on the theoretical part presented in the thesis.

I am also greatly indebted to Professor and Head of the Department Dr. T. M. Aliyev; Asst. Prof. Dr. A. G. Melnikov; and other staff members of the Department of Measuring and Computing Techniques, Azerbaijan Institute of Oil and Chemistry, Baku (USSR). The major part of the practical work presented in the thesis was impossible without their keen interest, suggestions and encouragement.

I wish to thank my colleagues and friends at I. I. T. Bombay and at the university of Cochin for their sincere discussions, encouragement and criticism.

I am also grateful to those friends who are responsible for giving the thesis a pleasant appearance.
