ACKNOWLEDGEMENT

Words cannot express my deepest sense of gratitude and indebtedness to my esteemed supervisor Dr. Kulwinder Singh whose constructive suggestions, excellent spirits, untiring willingness, judicious and illuminating guidance and able academic stimulus at every step have helped to a great extent in accomplishment of this investigation in its present form. To work under his supervision has not only been a fruitful learning, but also a privilege for me.

I can't help remembering my late revered father at this moment who had always been my guiding pillar. It was his earnest wish that has been fulfilled today. There is paucity of words to appreciate my mother for always backing me up with her patience and silent sacrifices. Their inspiration and selfless sacrifices will always remain indelible in my memory.

I am very grateful to my principal, colleagues, friends and family members for their ever encouraging moral support throughout the tenure of present investigation.

Acknowledgement of gratitude is also due to all the respondents for their patience and time they spared for me in sharing their experiences.

Wholehearted thanks are extended to all my students for their commendable co-operation.

Finally, I feel obliged to anyone who has even contributed a bit in completion of this work.

Parveen Grover
