LIST OF PUBLICATIONS

1. Spectrophotometric methods for the analysis of mixtures of captafol and captan or folpet fungicides.

2. Simple photometric titration methods for the determination of thiopentone sodium in injections.
Ind. J. Pharm. Sci., 2003 (Under Revision)

3. Determination of thiophanate-methyl in its formulated products and residues using differential pulse – polarography.
Pesti. Res. J. 2003 (Communicated)

4. Determination of some organoisothiocyanates and amines and the method for the analysis of drug and insecticide formulations based on them.
Ind. J. Chem. (Communicated)

5. Spectrophotometric determination of some thiourea derivatives and methods for the analysis of thiourea-based fungicide in formulated product and residues.
Ind. J. Chem. (In Preparation)

6. Extractive spectrophotometric determination of some organophosphorus insecticides in commercial formulations and residues.
