

	grade and its orders for 27 comparability sequences for Study 4 .....	228
6.34	Response table for Grey relational grade for Study 4 .....	230
6.35	Results of the analysis of variance for Study 4 .....	247
6.36	Results of confirmation test for Study 4 .....	249
6.37	Findings of the present research at a glance .....	259
6.38	Mean of data in the form of search time, motor action time and applied force under the impact of varying levels of CNC machine panel height, panel angle and working distance .....	261

## LIST of FIGURES

<b>Figure</b>		<b>Page</b>
2.1	Schematic representation of a human-machine interface system .....	10
2.2	Basic functions of human-machine interface system .....	15
2.3	Major stages in the human-CNC system design process .....	18
3.1	Classification of Machine Tool .....	23
3.2	World Machine Tool Production in 2010 (in %) .....	27
3.3	World Machine Tool Consumption in 2010 (in %) .....	28
3.4	Industry performance, consumption of machine tools for last five years ....	30
3.5	Future outlook Demand and Production projections to 2019-20 .....	31

3.6	Production of metal working machines- CNC and Non-CNC (Millions of rupees) .....	32
3.7	Production of metal cutting machines- CNC and Non-CNC (Millions of rupees) .....	33
3.8	Production of metal forming machines- CNC and Non-CNC (Millions of rupees) .....	33
3.9	Positions of sensors in a data acquisition system. Sensor 1 is noncontact, sensor 2 and 3 are passive, sensor 4 is active and sensor 5 is internal to a data acquisition system .....	36
5.1	Schematic diagram of the experimental set-up employed in all the experimental investigations undertaken in the present work .....	88
5.2	Working distances shown with colored strips .....	89
5.3	CNC machine panel height adjustment system .....	90
5.4	CNC machine panel angle adjustment mechanism .....	91
5.5	Variable height colored LEDs board .....	92
5.6	Displaying a full VDU screen square filled with green color in response to supplied green visual stimuli .....	93
5.7	Oscilloscope and switch board positions .....	94
5.8	Showing stand where camera was fixed .....	95
5.9	Male subject waiting for visual stimuli .....	96
5.10	Male subject performing motor action .....	97
5.11	Female subject waiting for visual stimuli .....	98
5.12	Female subject performing motor action .....	99
5.13	Load cells (piezo-electric sensors) fixed on mica-sheet .....	100

5.14	Recording of search time, motor action time and applied force through 2-channel Oscilloscope .....	102
6.1	Graph indicating Grey relational grade for Study 1 .....	115
6.2	Effect of HCMI parameter levels on multi-performance for Study 1 .....	117
6.3	Interaction plot for factor A and factor B for Study 1 .....	119
6.4	Interaction plot for factor B and factor C for Study 1 .....	120
6.5	Interaction plot for factor A and factor C for Study 1 .....	122
6.6	General factorial effects of interaction between CNC machine panel height and panel angle for Study 1 .....	123
6.7	General factorial effects of interaction between CNC machine panel angle and working distance for Study 1 .....	124
6.8	Normal probability plot of studentized residuals for Study 1 .....	126
6.9	Plot of externally studentized residuals (outlier t) versus run number for Study 1 .....	127
6.10	Plot of residuals versus CNC machine panel height for Study 1 .....	128
6.11	Plot of residuals versus CNC machine panel angle for Study 1 .....	129
6.12	Plot of residuals versus working distance for Study 1 .....	130
6.13	Graph indicating Grey relational grade for Study 2 .....	152
6.14	Effect of HCMI parameter levels on multi-performance for Study 2 .....	154
6.15	Interaction plot for factor A and factor B for Study 2 .....	156
6.16	Interaction plot for factor A and factor C for Study 2 .....	158
6.17	Interaction plot for factor B and factor C for Study 2 .....	159
6.18	General factorial effects of interaction between CNC machine panel height and panel angle for Study 2 .....	160

6.19	General factorial effects of interaction between CNC machine panel height and working distance for Study 2 .....	162
6.20	Normal probability plot of studentized residuals for Study 2 .....	164
6.21	Plot of externally studentized residuals (outlier t) versus run number for Study 2 .....	165
6.22	Plot of residuals versus CNC machine panel height for Study 2 .....	166
6.23	Plot of residuals versus CNC machine panel angle for Study 2 .....	167
6.24	Plot of residuals versus working distance for Study 2 .....	168
6.25	Graph indicating Grey relational grade for Study 3 .....	191
6.26	Effect of HCMI parameter levels on multi-performance for Study 3 .....	193
6.27	Interaction plot for factor A and factor B for Study 3 .....	195
6.28	Interaction plot for factor A and factor C for Study 3 .....	196
6.29	Interaction plot for factor B and factor C for Study 3 .....	198
6.30	General factorial effects of interaction between CNC machine panel height and panel angle for Study 3 .....	199
6.31	General factorial effects of interaction between CNC machine panel height and working distance for Study 3 .....	200
6.32	Normal probability plot of studentized residuals for Study 3 .....	202
6.33	Plot of externally studentized residuals (outlier t) versus run number for Study 3 .....	203
6.34	Plot of residuals versus CNC machine panel height for Study 3 .....	204
6.35	Plot of residuals versus CNC machine panel angle for Study 3 .....	205
6.36	Plot of residuals versus working distance for Study 3 .....	206

6.37	Graph indicating Grey relational grade for Study 4 .....	229
6.38	Effect of HCMI parameter levels on multi-performance for Study 4 .....	231
6.39	Interaction plot for factor A and factor B for Study 4 .....	233
6.40	Interaction plot for factor B and factor C for Study 4 .....	234
6.41	Interaction plot for factor A and factor C for Study 4 .....	236
6.42	General factorial effects of interaction between CNC machine panel height and panel angle for Study 4 .....	237
6.43	General factorial effects of interaction between CNC machine panel angle and working distance for Study 4 .....	239
6.44	General factorial effects of interaction between CNC machine panel height and working distance for Study 4 .....	240
6.45	Normal probability plot of studentized residuals for Study 4 .....	242
6.46	Plot of externally studentized residuals (outlier t) versus run number for Study 4 .....	243
6.47	Plot of residuals versus CNC machine panel height for Study 4 .....	244
6.48	Plot of residuals versus CNC machine panel angle for Study 4 .....	245
6.49	Plot of residuals versus working distance for Study 4 .....	246
