

A C K N O W L E D G E M E N T S

The author takes immense pleasure in expressing his deep sense of gratitude to Dr. R.L. Blokhra, Professor, Department of Chemistry, Himachal Pradesh University, Simla-171005 (India) for suggesting me the topic and for his constructive and valuable suggestions accompanied by kind help and encouragement.

Thanks are also due to Dr. M.L. Parmar, Assistant Professor, Department of Chemistry, Himachal Pradesh University, Simla, for his keen interest and suggestions during the course of investigations embodied in the present thesis, without whose help and constructive involvement this work would not have seen the present form.

The author is also thankful to Dr. K.C. Malhotra, Professor and Head of Chemistry Department, for providing the necessary laboratory facilities.

The author feels indebted to his family members for their constant inspiration and help during the tenure of this work.

The financial assistance from C.S.I.R. New Delhi (India) is gratefully acknowledged.
