Chapter 4: RESULTS
4.A. Morphological description of plants 41-48
4.B. Somatic chromosome number and karyotype study 48-53
4.B.1. Somatic chromosome numbers 48-49
4.B.2. Karyotype analysis 49-50
4.B.3. Chromosome characteristics 50-51
4.B.4. 4C DNA content and genome size 51
4.B.5. Statistical analysis of different chromosomal characteristics 51-52
4.B.6. Comparative data on chromosomal characteristics 52-53
4.C. Molecular analysis 54-56
4.C.1. RAPD analysis on inter-species genetic variability 54-56

Chapter 5: DISCUSSION
5.1. Plant morphology 57-58
5.2. Somatic chromosome number and karyotype 58-63
5.2.i. Chromosome number and karyotype 58-60
5.2.ii. Chromosome characteristics 60-62
5.2.iii. Chromosome number and chromosome size 62-63
5.2.iv. Chromosome length and karyotype 63
5.3. 4C DNA content 63-69
5.3.i. Chromosome number, chromosome size and amount of DNA 63-64
5.3.ii. Nuclear DNA amount in elation to total chromosome volume 64-65
5.3.iii. Amount of DNA and species diversity 65-69
5.4. RAPD analysis 69-71

Chapter 6: SUMMARY AND CONCLUSION 72-76

Chapter 7: REFERENCES 77-104
