ACKNOWLEDGEMENTS

I would like to record my deep sense of gratitude to Dr. Y. S. Rao, Nematologist, Central Rice Research Institute, Cuttack, for his suggestion of this problem and his valuable guidance and help during the course of the investigations and preparation of thesis.

I am grateful to Dr. S. Y. Padmanabhan, former Director and Dr. H. K. Pande, Director, Central Rice Research Institute for providing research facilities and encouragement.

I am indebted to Shri P. Israel, Retired Entomologist and former Principal Investigator, 'Biological Control Scheme on rice stem borers in India' for being provided with all facilities during the period of research.

My thanks are due to all my colleagues in the Biological Control Scheme, especially Sri V. N. Rao, Biological Control Officer, Central Rice Research Instt. whose manifold assistance helped in completion of the thesis and to Sri F. O. Das, Laboratory Attendant for his constant help in the laboratory. Thanks are also due to Sri C. P. Yadava, Sri P. Nayak and Dr. R. P. Srivastava for their kind gesture during the period of work.

I acknowledge with thanks, the help and encouragement provided by Dr. K. C. Mathur, Head, Division of Entomology,
Central Rice Research Institute, Cuttack.

To my parents, Srimati Y. Suryakanthamma and Sri Y. R. Viswanadham, to whom I dedicate this work, I submit my respectful thanks for having instilled in me the desire for the pursuit of this study.

I am also thankful to my wife Srimati Y. Janaki Devi and children, Miss. Y. Suryanageswari and Master Y. R. Viswanadham who subscribed their mite towards the fruition of this thesis by sacrificing many a moment, their due comfort, pleasure and play.

I take this opportunity to acknowledge the United States Department of Agriculture for financing some of the items of research included in this thesis.

Cuttack,
Dated, 31st December, 1977
(Y. R. V. JAGANNADHA RAO)
