ACKNOWLEDGEMENTS

First of all I pay my heartfelt gratitude to almighty God who provided me the vision and courage to complete this work. He guided me through every thick and thin through his innumerable and invisible ways to fulfill this endeavor of mine.

I feel great pleasure to express my deep sense of respect and sincere gratitude to my supervisor Prof. N.U. Khan, Professor, Department of Chemistry, Aligarh Muslim University, Aligarh, for his learned suggestions, gracious guidance and constructive criticisms at every stage of my thesis work. In fact, his interest, untiring and ever willing help, sympathy and meticulous and talented guidance has been much greater than what I deserve. I am really thankful to him that, in spite of his many preoccupations and heavy engagements, he supervised my work, and has stimulated my interest.

It is my profound pleasure to express my sincere and deepest sense of gratitude, gratefulness and indebtedness to my co-supervisor Prof. R.P. Singh, Professor, Department of Botany, Aligarh Muslim University, Aligarh, for his systematic and analytical approach blended with constructive criticism and innovative ideas that helped me to understand the basics of the research and to overcome many experimental hurdles. His encouragement and attention at every stage of my research carrier provided me spirit to complete this work.

I am highly obliged to Prof. S. A. Nabi, Chairman, Department of Chemistry and Prof. Arif Inam, Chairman, Department of Botany, Aligarh Muslim University, for providing all the necessary facilities and materials for conducting my experiments.

I owe a special thanks to my mother, Mrs. Archana Srivastava and father, Mr. Ashok Kumar Srivastava. Their love, understanding, encouragement and belief in me have been my constant source of motivation and their words of endearment and praise provided me the will to complete this work. I would also like to convey my thanks to my uncle, Mr. Anuj Kumar Srivastava and aunt, Mrs. Priyanka Srivastava for their moral support throughout my research period and to their kids Pranjal and Aarush for their vibrant love and affection. My loving thanks to my brother, Mr. Mohit Srivastava, who helped me in all respects of my life and inculcated in me the sense of patience and appreciation for niceties of the present competitive world, where excuses no more earn laurels.

I will be failing in my duty if I will not acknowledge the sincere and unprecedented cooperation extended to me by my husband, Mr. Sachin Srivastava. Research in any discipline unfolds untold problems for a researcher. I shared all the problems with my husband that not only eased out my tension but I had readymade answers.
I also owe special thanks to my parents-in-law, Mr. Sharad Kumar Srivastava and Mrs. Mamta Srivastava, and brother-in-law, Mr. Nitin Srivastava for their faith in me and their unconditional support without which I would not have been able to carry out my research work smoothly along with my household responsibilities.

Words alone are not adequate to translate my thanks to my senior Dr. Sujata Singh for her valuable suggestions and cooperation at every stage. I also want to extend my thanks to my research fellow, Miss Gazal Varshney and friends, Mr. Ziyauddin Khan, Miss Farah Khan, Miss Ahmad Jahan Khanam and Miss Farheen Khan for their help and support during the course of my research work.

Last but not the least, I am extremely thankful to my roommates, Miss Shabnam Khan and Miss Saleha Jamal for their love and care and moral support in all my endeavors during my stay in the hostel.
