ACKNOWLEDGEMENTS

I feel highly indebted to express my deep sense of gratitude to my learned teacher and guide Dr. R.L. Blokhra, F.N.A.Sc., Professor, Department of Chemistry, Himachal Pradesh University, Shimla, for his vigilant guidance, constant encouragement, keen interest, healthy and constructive criticism and patient supervision in bringing out the work in the present shape. Working with him has been a matter of delight that I will cherish in my memory in time to come.

I express my heartiest thanks to Dr. B.C. Verma, Professor and Chairman, Department of Chemistry, Himachal Pradesh University, Shimla, for providing the necessary laboratory facilities to carry out the research work executed in this thesis.

I am highly indebted to my mother, without whose inspiration and encouragement, I would not have been able to complete this work. It gives me immense pleasure to take the opportunity to dedicate this volume to her. I am grateful to my other family members for their ever available help and good wishes for the successful completion of this work.

I extend my sincere thanks to my friends and laboratory colleagues for their kind help and co-operation from time to time. The co-operation received from Mr. Rajesh Kumar, Mr. Jitender S. Chandel and Mr. Mahavir Verma in the last stage of this work is thankfully acknowledged. Thanks are also due to Mr. Vinod K. Sharma for typing this thesis and Mr. G.L. Thakur for tracing work. All might not have been mentioned but none is forgotten.

The financial assistance received from University Grants Commission, New Delhi, in the form of a Research Fellowship is highly acknowledged.

(CHANDER PRAKASH)
