

## LIST OF TABLES

Table No.	Statement	Page
1.	Details of the sample of the first draft of the criterion test.	48
2.	Specification of items in the first draft of the criterion test.	49
3.	The distribution of discriminating power(D.P) of the items of the first draft of the criterion test.	51-52
4.	The distribution-percentage of the correct responses and the distractors in the first draft of the criterion test.	53
5.	Computation of reliability co-efficient of the first draft of the criterion test.	55
6.	Details of the sample of the second draft of the criterion test.	56
7.	Specification of items in the second draft of the criterion test.	57
8.	The distribution of discriminating power(D.P) in the second draft of the criterion test.	58
9.	Computation of reliability co-efficient of the second draft of the criterion test.	60
10.	Structure of the sample for individual testing.	78
11.	Structure of the sample for small-group testing.	82

Table No.	Statement	Page
12.	Error rate of the units and the whole programme at the small group testing stage.	85
13.	Percentage of errors on frames in small group testing(Unit-wise)	86
14.	Type token ratio of the programme after small group testing.	88
15.	90/90 standard analysis at the small group testing stage.	90
16.	The criterion test scores of ten students selected for sequence progression.	91
17.	Structure of the sample for field testing stage.	93
18.	Error rate of different units and the whole programme at the field group testing stage.	95
19.	Frames having more than 10% error rate at the field testing stage.	96
20.	Type token ratio of units and the whole programme at the field testing stage.	97
21.	The criterion test scores of 15 students selected for sequence progression at the field testing stage.	99
22.	90/90 standard analysis done at the field testing stage.	101

Table No.	Statement	Page
23.	Test-retest and split half reliability coefficients of LOA tasks (Muthayya, 1959)	111
24.	Split-half reliability coefficients of the three level of aspiration tasks	112
25.	Validity of the three level of aspiration tasks.	113
26.	Schematic representation of the 3 x 3 factorial design.	117
27.	Treatment combinations of 3 x 3 factorial design.	118
28.	Structure of the sample in respect of class, average age and schools/colleges selected for the experiment.	120
29.	Structure of the sample in respect of level of aspiration selected for the experiment.	124
30.	Sample size for the final analysis.	126
31.	Time taken to complete the administration of three level of aspiration tasks.	132
32.	Total average time taken to complete the programme and total number of days spent on experimentation.	135
33.	Analysis of 3 x 3 factorial design.	138
34.	Sums of Pre-test and Post-test scores in respect of I, II, III, treatment groups	142

Table No.	Statement	Page
35.	Sums of Pre-test and Post-test scores in respect of IV, V, VI treatment groups.	142
36.	Sums of Pre-test and Post-test scores in respect of VII, VIII, IX treatment groups.	143
37.	Analysis of variance of Pre-test scores.	144
38.	Analysis of variance of Pre-test and Post-test scores.	146
39.	Outcomes of 3 x 3 factorial design	148
40.	Summary of analysis of variance.	152
41.	Summary of 3 x 3 multifactor analysis of variance.	157
42.	Expected value of means for nine treatment combinations.	160
43.	Comparison of actual and expected means.	162
