

CONTENTS

	<u>Page</u>
CHAPTER I INTRODUCTION	1
1.1. Physical oceanographic practices	3
1.2. Oceanographic computations	9
1.3. Scheme of present work	17
CHAPTER II THEORY OF ERRORS	19
2.1. Errors of observations and measurements	19
2.2. Errors in approximations	20
2.3. Errors in computations	21
2.4. The law of propogation of errors	33
CHAPTER III ERRORS IN THE MEASUREMENT OF THE INDEPENDENT OCEANOGRAPHIC PARAMETERS	34
3.1. Temperature	34
3.2. Pressure	40
3.3. Salinity	48
3.4. On the accuracy of <u>in situ</u> salinometers	59
CHAPTER IV ERRORS IN THE COMPUTATION OF DEPENDENT OCEANOGRAPHIC VARIABLES	63
4.1. Density <u>in situ</u> and σ_t	63
4.2. Specific volume and specific volume anomaly	72

	<u>Page</u>
CHAPTER V ERRORS IN THE COMPUTATION OF DERIVED QUANTITIES	77
5.1. Dynamic depth anomaly of isobaric surfaces	77
5.2. Relative currents	88
CHAPTER VI IDENTIFICATION OF A ZERO REFERENCE LEVEL	94
6.1. Determination of an appropriate reference surface	94
6.2. Identification of a level where the current velocity is negligibly small	102
CHAPTER VII COMPUTATION OF DYNAMIC HEIGHT ANOMALY	114
7.1. Extending the selected zero reference surface into shallow regions	115
7.2. A new method suggested for the extension of computation into shallow regions	120
7.3. Smoothing the dynamic relief in a profile of an isobaric surface	123
CHAPTER VIII COMPUTATION OF GEOSTROPHIC CURRENTS	126
8.1. Reduction of the computed geostrophic current with reference to 1500 d bar surface to 3000 d bar surface	126
8.2. Summary and conclusions	134
