ACKNOWLEDGEMENTS
ACKNOWLEDGEMENTS

First and foremost, all the praises and thanks to Allah, The Exalted and Glorified, for inspiring me towards knowledge and blessed me with required strength and enough passion to start and finally to complete this challenging task.

I have worked with a number of people whose contribution in assorted ways to the research and the making of thesis deserve special mention. It is a pleasure to convey my gratitude to them all in my humble acknowledgement.

I was extraordinarily fortunate in having Dr. Rafiqullah Khan as my supervisor. His sage advice, insightful criticism and patient encouragement aided the writing of this thesis in innumerable ways. Moreover his perpetual energy and enthusiasm in research has motivated me, in addition he was always accessible and willing to help. As a result research life became smooth and rewarding for me. In many ways I have learnt much from and because of him! His involvement with his originality has triggered and nourished my intellectual maturity that I will benefit from, for a long time to come. One simply could not wish for a better and friendlier supervisor. I am indebted to him more than he knows.

I gratefully acknowledge Prof. A.H. Khan for his crucial contribution, suggestions and willingness to share his bright thoughts, which were very fruitful for shaping up my research. He is really a constant oasis of ideas and passion in Statistics which exceptionally inspire and enrich my growth as a student and as a researcher also.

I also want to thank Prof. M.M. Khalid, Chairman, Department of Statistics and Operations Research, for providing me the necessary facilities during my research.

Next, I want to accord my profound thanks to Dr. H. Athar for providing an experienced ear for all my doubts and ambiguities. It is impossible to reference the knowledge and insight gained from the discussions with him.

My sincere thanks are extended to Dr. S.N. Alam, Prof. M.Z. Khan, and Prof. M. Yaqub for encouragement and interest, they took in the programme of my research.
My collective and individual acknowledgements are also owed to my seniors and colleagues, whose presence somehow perpetually refreshed, helpful, and memorable. Many thanks go in particular to Rahul, S. Zarrin, S. Ghurran, Saman, Izhar, Imtiyaz and Devendra for giving me such a pleasant and fruitful time when working together and exhilarating time while travelling together for conferences. Thanks are also due to staff of the department, computing lab and seminar for their assistance and cooperation.

The warm support of all my friends, Nazia, Sheeba, Nusrat, Habeeba, Lubna, Sayyada, Hushmud and Huma, has enabled me to complete this thesis and have a wonderful time along the way. Their loyal assistance has enabled me to bypass the more persistent obstacles to thesis completion.

My grandmother, uncles M.S. Khan and M.U. Khan, and sister Farhana, deserve special mention for their encouragement and prayers. I am forever grateful to them for the gentle offer of counsel and unconditional support at each turn of the road.

Words fail me to express my indebtedness and gratitude to my parents for their unequivocal support throughout, as always, for which my mere expression of thanks likewise does not suffice. Their unflagging love, energetic support and persistent confidence in me, has taken the load off my shoulder and clearing the path towards thesis completion.

I would like to acknowledge the financial support from the University Grants Commission, India under Maulana Azad National Fellowship Scheme to carry out this research work.

Lastly, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention them personally, one by one.

Finally, for any errors or inadequacies that may remain in this work, of course, the responsibility is entirely my own.
