LIST OF PLATE AND FIGURES

PLATE

CHAPTER - 1

Plate - 1 : The Geological map of IB-River Coalfield showing the borehole locations.

FIGURE

CHAPTER - IIB

Fig. 1 : X-ray diffractogram of powdered coal samples.

CHAPTER - IIIA

Fig. 2 : Mode of occurrence of trace elements in coal.

Fig. 3 : Graph showing relationship between trace element content in the ash with the ash content of coal of borehole no. HGM-6 (Lajkura Seam).

Fig. 4 : Graph showing relationship between trace element content in the ash with the ash content of coal of borehole no. HGK-15 (Lajkura Seam).

Fig. 5a : Graph showing relationship between trace element content in the ash with the ash content of coal of borehole no. CMHG-68, newly name - CMPDI (Lajkura Seam).

Fig. 5b : Graph showing relationship between trace element content in the ash with the ash content of coal of borehole no. CMHG-68, newly name CMPDI (Rampur seam).

CHAPTER - IIIB

Fig. 6 : Graph showing normalised REE value of different samples (Ordinate) against respective names of borehole no. HGK-15 (Lajkura Seam).
Fig. 7 : Graph showing normalised REE value of different samples (Ordinate) against respective names of borehole no. HGM-6 (Lajkura Seam).

Fig. 8 : Graph showing normalised REE value of different samples (Ordinate) against respective names of borehole no. CMHG-68, newly name - CMPDI (Lajkura Seam).

Fig. 9 : Graph showing normalised REE value of different samples (Ordinate) against respective names of borehole no. CMHG-68, newly name - CMPDI (Rampur Seam).

Fig. 10 : Graph showing normalised REE value of different samples (Ordinate) against respective names of borehole no. CMHG-68, newly name - CMPDI (Lajkura and Rampur Seam combined).
