## CHAPTERS

	<b>Page</b>
<b>Chapter 1: INTRODUCTION</b>	<b>1-18</b>
1.1. Economic importance	2
1.2. Classification	6
1.3. Origin and evolution	9
1.4. Diversity, distribution and phylogeny of Phaseolinae	10
1.5. Molecular markers in classification and phylogeny	16
<b>Chapter 2: REVIEW OF LITERATURE</b>	<b>19-50</b>
2.1. Taxonomy and phylogeny of Leguminosae	19
2.2. Classification and phylogenetic relationship among the members of the tribe Phaseoleae	22
2.3. Taxonomy and phylogeny of the sub-tribe Phaseolinae	23
2.4. Application of molecular markers in phylogenetic studies	29
2.4.1. RAPD as molecular marker	32
2.4.2. Application of ISSR marker	35
2.4.3. Use of RAPD, ISSR and other markers in combination	37
2.5. Application of molecular markers in study of systematics and phylogeny of legumes	39
2.6. Use of molecular markers for study of genetic diversity and phylogeny in the sub-tribe Phaseolinae	43
<b>Chapter 3: MATERIALS AND METHODS</b>	<b>51-58</b>
3.1. Plant material	51
3.1.1. Collection and preservation of voucher (herbarium) specimens	51
3.2. Molecular analysis	52
3.2.1. Isolation of genomic DNA	52
3.2.2. Purification of genomic DNA	53
3.2.3. Test for quality and quantity of the purified DNA	54
3.3. Molecular techniques	54
3.3.1. Random amplified polymorphic DNA (RAPD) analysis	54
3.3.2. Inter simple sequence repeat (ISSR) analysis	55
3.4. Agarose gel electrophoresis and documentation	56
3.5. Statistical analysis of the data	57
3.5.1. Scoring the data	57
3.5.2. Resolving power (RP)	57
3.5.3. Primer index (PI)	57
3.5.4. Jaccard's similarity	57
3.6. Analysis of genetic diversity and differentiation within and among populations	58
3.7. Analysis of molecular variance (AMOVA)	58

<b>Chapter 4: RESULTS</b>	59-84
4.1. Genomic DNA isolation and quantization	59
4.2. Genetic diversity among landraces of rice bean( <i>Vigna umbellata</i> ) as inferred from ISSR markers	59
4.2.1. Evaluation of genetic diversity and differentiation in rice bean ( <i>Vigna umbellata</i> ) populations	60
4.3. Genomic relationship among the accessions of <i>Vigna mungo</i> and <i>Vigna radiata</i>	61
4.3.1. Genetic diversity and phylogenetic studies using RAPD marker	61
4.3.2. Genomic characterization through ISSR	63
4.3.3. Genetic relationship using combined RAPD and ISSR marker	64
4.4. Estimation of genetic diversity and molecular phylogeny among species of the genus <i>Vigna</i>	65
4.4.1. Assessment of genomic relationship with application of RAPD technique	65
4.4.2. Genome analysis using ISSR markers	67
4.4.3. Analysis of phylogeny using RAPD and ISSR combined markers	69
4.5. Analysis of molecular phylogeny among and within taxa of <i>Vigna</i> and <i>Phaseolus</i>	70
4.5.1. RAPD analysis	70
4.5.2. ISSR analysis	71
4.5.3. Genomic analysis using combination of RAPD and ISSR markers	72
4.6. Study of genomic relationship among the species and accessions of <i>Dolichos</i> and <i>Lablab</i>	74
4.6.1. Assessment of genetic relationship through RAPD marker	74
4.6.2. Evaluation of phylogeny through ISSR marker	75
4.6.3. Assessment of genetic similarities with application of combined RAPD and ISSR markers	76
4.7. Genetic diversity and phylogenetic relationship among all the taxa of the sub-tribe Phaseolinae	77
4.7.1. Genomic relationship as inferred from RAPD analysis	78
4.7.2. Genomic relationship as inferred from ISSR analysis	80
4.7.3. Assessment of genomic relationship with the application of RAPD and ISSR marker combination	82
<b>Chapter 5: DISCUSSION</b>	85-112
5.1. Assessment of genetic variability among the landraces of <i>Vigna</i>	86
5.2. Genomic relationship among the accessions <i>Vigna mungo</i> and <i>Vigna radiata</i>	90
5.3. Estimation of genetic diversity and molecular phylogeny among species of the genus <i>Vigna</i>	95
5.4. Analysis of molecular phylogeny among taxa of <i>Vigna</i> and <i>Phaseolus</i>	101
5.5. Study of genomic relationship among the species and accessions of <i>Dolichos</i> and <i>Lablab</i>	103
5.6. Genetic diversity and phylogenetic relationship among all the taxa of the sub-tribe Phaseolinae	106
<b>Chapter 6: SUMMARY</b>	113-120
<b>Chapter 7: REFERENCES</b>	121-161
