ACKNOWLEDGEMENT

The work described in this thesis has been carried out in the Department of Biochemistry, University of Kerala, Trivandrum. The author takes this opportunity to express her deep sense of gratitude to Dr. P.A. Kurup, Professor and Head of the Department of Biochemistry, under whose supervision this work was carried out, for his inspiring and efficient guidance and the constant encouragement she got throughout the course of this work.

The author wishes to acknowledge the co-operation and help she has always received from the members of staff and students of the Department of Biochemistry. Her thanks are in particular due to Dr. G. Arthur Vijayan Lal, Veterinary Doctor and also to Smt. G. Padmaja who was a research student of this Department. The technical assistance rendered by Smt. N. Jayakumari and Smt. P. Prema in carrying out the various biochemical estimations is gratefully acknowledged.

Thanks are also due to U.G.C. for the award of a Junior Research Fellowship throughout the whole period of this work.
