

Acknowledgements

I would like to take this opportunity to first and foremost thank God for being my strength in the writing of this thesis. Without Him, I would not have had the wisdom or the physical ability to do so.

*At this moment of accomplishment, first of all, I pay homage to my guide, **Professor Arun Bharti**. This work would not have been possible without his guidance, support and encouragement. For me, he is a pillar of support and epitome of strength. I am glad to be his student, a million thanks to him, as he gave me the strength, to make my dreams come true. His guidance, support and vision will be a long lasting influence in my professional and personal life.*

*I am also extremely indebted to my joint-supervisor, **Professor Rajeev K. Puri**, Panjab university, Chandigarh. He has especially contributed a lot to this thesis. This work would not have been possible without his guidance, support, valuable advice, constructive criticism and his extensive discussions around my work. His mission for providing 'only high-quality work and not less' has made a deep impression on me. He is the source of endless inspiration even during the most stressful times.*

*I gratefully acknowledge **Dr. Sakshi Gautam** for her understanding, encouragement and personal attention which have provided good and smooth basis for my Ph.D. tenure. I can see the good shape of my thesis because of her help and suggestions. Her steady courage and conviction will always inspire me.*

*I would like to extend my sincere thanks to Prof. **Jörg Aichelin** and **Dr. Christoph Hartnack**, at SUBATECH, Nantes in France, for interesting and fruitful discussions.*

*I offer my special thanks to **Professor Vivek Gupta**, head of the department of Physics & Electronics, University of Jammu, Jammu for providing all necessary facilities in the department. Also, the author wishes to express his thankfulness to the staff of the Physics & Electronics department for their kind support.*

I take this opportunity to sincerely acknowledge the access of the HPCC facilities at IUAC, New Delhi and at department of Physics, Panjab University, Chandigarh.

I expand my thanks to Prof. S. K. Khosa and Dr. Rani Devi for their best wishes.

With great appreciation, I acknowledge my present and past lab members, Dr. Suram Singh, Dhanvir Singh, Dr. Chetan Sharma, Deepti mam, Anuradha and Surbhi for their

support and encouragement. They are like family members to me.

I also acknowledge with thanks the support and encouragement extended by theory group at Chandigarh, particularly, Dr. Sukhjit, Dr. Rajni, Chug Sir, Raj mam, Dr. Karan, Dr. Anupriya, Mandeep mam, Preeti and Samiksha for their help and support throughout this study. My special appreciation goes to my close friends Rohit, Ruchi, Sandeep, Vikram and Bali for their help and support throughout this study.

I am also indebted to some of my good friends Dr. Ahasan, Mukesh Sharma, Amit, Dr. Rashmi, Varun, Aman Priya and Abhinav for their valuable help and support.

I would like to thank my childhood friends Dr. Aman, Sahil, Pathania, Rakesh, Mithun, Pawan, Raina, Vaid, S.P, Ravi, O.P, Vijay, Parmodh, Raja, Vijay Shastri and Satpaul for their all times support.

Finally, I owe a special thanks to my family members. This thesis would not have been possible without the confidence, endurance and support of my family. My family has always been a source of inspiration and encouragement. Words cannot express the love and synergy provided by my brother and Bhabi. I can not forget to mention my sweet nephew, Ansh, whose cheerful face always made me to forget all worries. I dedicate this work to you all.

Finally, I also owe a lot to many others, who helped me directly or indirectly in completing my thesis work and who will always remained unnamed, still I hope, they will understand and accept my sincere thanks.
