ACKNOWLEDGEMENT

With deep regards and profound respect, I avail this opportunity to express my deep sense of gratitude and indebtedness to Dr. A.S. Kadam for their inspiring guidance, encouragement, constructive criticism and valuable suggestion throughout the research work. It would have not been possible for me to bring out this thesis without their help and constant encouragement.

I am also grateful to Prof. R.S. Mane (School of Physical Sciences, SRTM University, Nanded) for allowing me to work in his lab. His vast knowledge in the field of material science and technology has enlightened me in different areas of this experimental research work. His deep sense of appreciation and dedication to research has been a constant source of inspiration to me.

I’d like to thank Dr. V.V. Jadhav (Post Doctoral Fellow, Pusan National University, Busan, South Korea) for characterization of Selenium nanoparticles. I am thankful to the Dean, PGISV Akola, Dr. C.N. Khobragade, Director, SLS, SRTM University, Nanded, Dr. N.S. Solanke, Head, Dept. of Botany, Adarsh College, Hingoli, Principal, New Model Degree College, Hingoli for providing the facilities for this work. I am also thankful to Dr. K. Khose, Associate Professor, Dept. of Poultry and Dr. S. Hajare, Head, Dept. of Pharmacology, PGISV Akola, for their help and guidance during biological trials.

I’d like to thanks Dr. G.B. Zore and Dr. L.H. Kamble for their support and encouragement during my Ph. D. I also thank to members of the Prof. R. S. Mane lab, Dr. Zate, Dr. Tehare, Mr. Mutkule, Mr. Ahemed for their help and valuable suggestions.

I am also thankful to teaching and non teaching members of SLS, SRTM University, Nanded and New Model Degree College, Hingoli. My gratitude also goes to my friends Dr. Swapnali Shirsat, Dr. Madhuri Shastri, Ms. Poonam Agarwal, Mrs. Archana Zore and Dr. Laxmi Galande and colleagues Ruhi Rizvi and Jeevan Kote.
This would have been impossible without love and affection of my parents, Shri. Dnyandeorao S. Shirsat and Sow. Shindhu D. Shirsat to complete this work, I am thankful to them for their enduring support, encouragement and thoughtful advice throughout my life. I am thankful to my siblings Dr. Shraddha and Rahul, for encouraging and supporting me, especially during the difficult times, ensuring that I reached this final stage.

I also thankful to King Saud University, Deanship of Scientific Research, College of Science Research Center and Global Frontier Program, through the Global Frontier Hybrid Interface Materials (GFHIM) of the National Research Foundation of Korea (NRF) funded by the Ministry of Science, ICT & Future Planning (2013M3A6B1078874) for financial support.

July 2016

Ms. Shubhangi Dnyandeo Shirsat
