

## CONTENTS

	Topic	Pg.No
<b>CHAPTER</b>	<b>1 INTRODUCTION</b>	
	1.1 Introduction	1
	1.2 Historical background of study of binary liquid mixtures	5
	1.3 Brief Review of the Theories of liquid mixtures	9
	References	17
<b>CHAPTER</b>	<b>2 BRIEF SURVEY OF LITERATURE</b>	
	2.1 Viscosity studies	22
	2.2 Ultrasonic velocity studies	37
	2.4 Aim and Scope of the Present study	39
	References	41
<b>CHAPTER</b>	<b>3 MATERIALS AND EXPERIMENTAL METHODS</b>	
	3.1 Purification of chemicals and preparation of mixtures	45
	3.2 Density Measurements	47
	3.3 Viscosity Measurements	52
	3.4 Ultrasonic velocity Measurements	56
	References	60
<b>CHAPTER</b>	<b>4 VOLUMETRIC AND VISCOMETRIC STUDIES</b>	
	4.1 Introduction	62
	4.2 Volumetric and viscometric studies of binary liquid mixtures of methyl carbitol(MC)with amines at 308.15K.	65
	4.3 Volumetric and viscometric studies of binary liquid mixtures of ethyl carbitol(EC) with amines at 308.15 K.	73
	4.4 Volumetric and viscometric studies of binary liquid mixtures of butyl carbitol(BC) with amines at 308.15 K.	81
	References	88
<b>CHAPTER</b>	<b>5 ULTRASONIC VELOCITY STUDIES</b>	
	5.1 Introduction	93
	5.2 Ultrasonic study of binary liquid mixtures of methyl carbitol with amines at 308.15 K.	98
	5.3 Ultrasonic study of binary liquid mixtures of ethyl carbitol with amines at 308.15 K.	104
	5.4 Ultrasonic study of of binary liquid mixtures of butyl carbitol with amines at 308.15 K.	110
	References	115
<b>CHAPTER</b>	<b>6 SUMMARY</b>	119
<b>ANNEXURE</b>	<b>LIST OF PAPERS PUBLISHED/ COMMUNICATED LIST OF PAPERS PRESENTED IN SEMINARS /CONFERENCES</b>
