Acknowledgement

Today, I pick my pen to express my heart felt thanks to all those who helped me realize what I consider so dear. I have no dearth of feelings but only an understanding of the futility of my expression. For, I am sure, I can never manage to bring forth my sincere gratitude towards all who have meant so much in the formation of this project. Yet I shall try.

I humbly wish to express my deepest gratitude for having been associated with Dr. R.C. Arora, M.D. D.Sc, Professor and Head, Deptt. of Medicine M.L.B. Medical College, Jhansi. Am really very lucky to have had an opportunity to work with him. In his footsteps, I have found a definite path for rest of my life time, also which has provided me the confidence and enthusiasm so essentially vital for successful accomplishment of this project. His constant supervision, constructive and valuable criticisms, efficient and unfainting beneficance and above all his affectionate nature, heartening words and constant encouragement have made this travel delightful and possible for me.

In no less degree I express my sincere thanks to my co-guide Dr. Sunita Arora M.S., Professor, Department of Obstetrics and Gynaecology, M.L.B. Medical College, Jhansi, and Dr. P Kumar M.D. D.M Dip. Card., Professor of Cardiology, M.L.B. Medical College, Jhansi. It is to the credit of their knowledge and excellence in expression, that this work could be brought out in its present form.

For my friends and junior colleagues, a sense of gratitude and thanks that can not be quantified in words. They were always willing and ever dependable to lend a helping hand, whenever I needed it, despite being busy with a hectic schedule of their own.
It gives me special pleasure to express my appreciation to
constant inspiration to complete this venture.

Last but not the least, I would like to extend my heartfelt thanks to Mr. 
Praveen Arora who has so meticulously and dexterously compiled my thesis in its present form.
