55. The ages of children for this study ranged from 5-16 (Hansen, Meissler, & Ovens, 2000). ... 2002).

मानसिक विकासात्मकता, दुर्बल की कमी, धीमी गति से सीखने वाले बालक,
अल्पवुद्धि सभी एक ही रीति के अलग-अलग नाम है। वर्तमान में इन बच्चों को चेलेब्रिजिंग
विकल्प नाम दिया गया है। तथा डिजाइन एमिटिटी के नाम से भी जाने जाते हैं। इन बच्चों की
दुर्बल क्षमता औसत से कम होती है अर्थात सामान्य बच्चों से कम होती है तथा इनका व्यवहार
भी सामान्य बच्चों से अलग होता है।
