

C O N T E N T S

<u>Chapter 1</u>	<u>Cerenkov radiation - Introduction and Survey</u>	5
A :	Historical development	6
B :	Classical treatment of Cerenkov radiation	8
C :	Modifications introduced by Quantum theory	15
D :	Extensions of the theory	16
E :	Cerenkov radiation and other competitive processes	18
F :	Doppler effect in an isotropic medium	30
G :	Cerenkov radiation from a particle in the proximity of a dielectric	36
H :	Effects of magnetic fields	44
I :	Effects of electromagnetic waves	47
J :	Effects of alternating electric fields	56
<u>Chapter 2</u>	<u>Effect of alternating electric field on Cerenkov radiation in an infinite dielectric</u>	62
A :	Introduction	62
B :	General expression for the radiation and analysis	62
B (I) :	Parallel field	62
B(II) :	Perpendicular field	88
<u>Chapter 3</u>	<u>Effect of alternating electric field on Cerenkov radiation due to a charge moving above a boundary separating two media</u>	96

Contents - Contd.

A :	Introduction	96
B :	General expression for the radiation and analysis	98
B (I) :	Parallel field	98
B (I.1) :	Field potentials in the upper half-space	101
B (I.2) :	Field potentials in the lower half-space	106
B (I.3) :	The charge e moves at a height h from the surface of a dielectric in vacuum	112
B (I.4) :	The charge e moves exactly along the surface of a dielectric	120
B (II) :	Perpendicular field	123
B (II.1) :	Field potentials in the upper half-space	124
B (II.2) :	Field potentials in the lower half-space	126
B (II.3) :	The charge e moves in vacuum at a height h from the surface of a dielectric	131
B (II.4) :	The charge e moves exactly along the surface of a dielectric	132
<u>Chapter 4</u> :	<u>Summary - Results and Conclusions</u>	136
	<u>References</u>	144
