

ACKNOWLEDGEMENTS

It is with great pleasure that I wish to express my warm gratitude to Dr. A.V. RAMA RAO, Dy. Director and Head, Division of Organic Chemistry, NCL, for suggesting me the problem and giving invaluable and never failing guidance.

I owe a debt of gratitude particularly to Drs. V.H. Deshpande and J.S. Yadav, with whom I had the privilege of working during this period. They have given me all possible encouragement throughout the course of this work.

My thanks are also due to all my colleagues for their kind co-operation, especially I would like to mention the names of Dr. K. Bal Reddy and Dr. G.V.M. Sharma who have been a great source of inspiration to me for completing the work.

I am thankful to Dr. M.K. Gurjar for his constructive comments on the manuscript, and to Mr. S. Venkataraman for his excellent typing of the manuscript.

Assistance from spectroscopic and microanalytical sections of the laboratory is gratefully acknowledged.

The financial assistance through a grant from the Science & Technology Cell, Education and Youth Services Department, Maharashtra State is gratefully acknowledged.

I am thankful to the Director, National Chemical Laboratory, Poona, for allowing me to submit this work in the form of a thesis.

The list of acknowledgements would be incomplete if I do not mention the moral support given to me over all these years by my family members, especially my brother Maj. G.S.Saiprasad. This thesis owes a great deal to them.
