

44. __________ (1964) : Some recent work and further problems in the theory of queues. Theor. Probability Appl. 9, 1-15.

   Toronto.

   Modelling, 16, 36-42.

67. _______ (1968) : Two queues in series with a finite intermediate waiting room, J. Appl. Prob. 5, 123-142.

69. _______ (1978) : Markov chains with applications in queueing theory, which have matrix geometric invariant probability vector. Advances in Appl. Probaility, 10, 185-212.

70. _______ (1978) : The M/M/1 queue with randomly varying arrival and service rates. Opsearch 15, 139-157.
