

List of Tables

1.1	Major vegetation types of the Western Ghats	10
1.2	Endemic species of the Western Ghats	12
1.3	Distribution of PAs in the Western Ghats	13
1.4	Project elephant reserves and estimated population in the Western Ghats	15
1.5	Wet evergreen forest types of Karnataka	16
1.6	Number of species of endemic vertebrates in the Western Ghats of Karnataka	18
1.7	Diversity of amphibians in the Western Ghats	20
3.1	Common trees and shrubs found in the wet evergreen forests of study landscape	44
3.2	Brief description of the four study localities	50
4.0	The list of species identified in the 3 years along with their code numbers and family	66
4.1	Species richness and abundance in the study sites/habitats during the 3 years	68
4.2	Overall species richness (presence/absence) of the 6 sites/habitats studied	70
4.3	Comparison of the amphibian species richness of the 6 sites/habitats studied	71
4.4	Comparison of the amphibian abundance of the 6 sites/habitats studied	73
4.5	The 38 species and their total abundance (%) and dominance rank during the study period of 3 years across all the sites/habitats/seasons and sampling methods	74
4.6	The yearly variations in the abundance/rank of the 15 most numerous species of amphibians during the study	77
4.7	Differences in the abundance of amphibians in the 6 study sites/habitats during the different seasons	81
4.8	Seasonal variations in the occurrence and abundance/rank of the 38 species recorded during the study	83
4.9	Amphibian species diversity in the 6 study sites/habitats	85
4.10	Overlap in species composition between the 6 sites/habitat types studied	87
