ACKNOWLEDGEMENTS

I must express my deep sense of gratitude to Dr. S. N. Hegde, M.Sc., Ph.D., M.I.Biol., Reader in Biosciences, Mangalore University, for his valuable guidance and constructive criticisms during the period of present investigation. I consider it a pleasant duty also to thank Mrs. Bharathi S. Hegde for all her encouragement and kindness.

Drs. H.S. Patil and S. Basalingappa of the Karnataka University and Drs. J. Uchil and Sridharamurthy of the Mangalore University have been the source of great encouragement to me. Similarly, my friends Prakash, Kareddy, Shankar, Rajshekar and Chandra have helped me in innumerable ways; I thank them all. My special thanks are due to Dr. Akhtar Mahmood, now at the Department of Paediatrics, Children's Memorial Hospital, University of Oklahoma, U.S.A. for his invaluable help and interest in the initial stages of present study which took shape at the Department of Biochemistry, P.G.I., Chandigarh. I am also grateful to Prof. A.N. Radhakrishnan, School of Life-Sciences, University of Hyderabad for so kindly sparing me his laboratory facilities with labeled sugars and amino acids.

The financial assistance received from the Universities of Karnataka and Mangalore is gratefully acknowledged. I thank Dr. M. Abdul Rahiman, Prof. & Head, Department of Biosciences for the facilities provided.

Finally, I would like to place on record my indebtedness to my dear parents and family members for their unstinted encouragement, understanding (I could not be with them on important occasions) and moral support throughout my educational career.

Shivakumar D. Patil
