ACKNOWLEDGEMENT

I have been especially fortunate to have more than my share of getting the coveted chance of working under the able guidance of Dr. (Mrs.) Aleyamma Kurian, Director of Postgraduate studies, Institute of Nursing Sciences, Mangalore. This manuscript is the voucher of her insightful guidance, supervision and constant motivation. I am deeply indebted to her and express my gratitude through this column, which is but a micro expression of my otherwise inundated grateful heart.

I am particularly grateful to Dr. M.R. Shetty, Secretary, MVST, Mangalore under whose dynamic leadership the Ph.D Programme in Nursing came into being in Mangalore University. Had it not been for his initiative this piece of work towards the programme would not have come to light.

My Sincere thanks to Prof. (Mrs.) Saraswathi Amma, Principal, INS, Mangalore and the faculty members who had given me great support during the entire period of the study.

I am grateful to Dr. Aparna Bhaduri, Professor in Nursing, MAHE, Manipal, who had timely instilled an insight in me to steer my study when it almost seemed directionless.

My deep indebtedness goes to Dr. P.K. Choudhury, Professor and Head Department of Psychiatry, Assam Medical
College, Dibrugarh, Dr.(Capt.) T.K. Saikia, Dy. Chief Medical
officer, OIL, Duliajan, Dr. P.K. Saikia, Medical Officer,
AOC, Digboi, Dr. Binoy Phukan, Medical Officer, Lankasi Tea
Estate, Mr. B. Neog, Chief Pharmacist, Bozaloni Tea Estate
and Dr. P.K. Dutta, Associate Dean, Lakhimpur College of
Veterinary Science who had not only helped me in various
stages of data collection, but also words of encouragement
and suggestion, at the time when I needed most.

Words fail to express my gratefulness to Dr. K.K.
Saharia, Head, Department of Extension Education, College of
Veterinary Science, Guwahati, who had lucidly helped me out
while I was battling in the arena alone. Without his
constant help, thought provoking suggestions, guidance and
critical edition, this piece of work would have born invalid.

A sincere word of gratefulness to Dr. Robin Goswami,
Associate Professor of Animal Genetics and Breeding, College
of Veterinary Science, Guwahati, for his invaluable computer
wizardry, during my hours of need.

A childhood alma mater friend, Mr. Praveer Choudhury,
Advocate, Supreme Court, deserves special mention with my
gratitude who had constantly been a source of inspiration and
also who had shelled out his time to edit and suggest legal
aspects of alcoholism.

There is one individual who was pivotal to this study
and my mainstay: My husband Dr. H.N. Khanikor, Professor and
Head of the department of Pharmacology, College of Veterinary Science, Guwahati. From the inception of this study he had been my mentor who instilled unflagged enthusiasm and constant support even when the going got rough. His tireless effort and patience, his assuring shoulder during distress were the key towards this arduous job.

The entire pain of the period was mutely borne by my daughter KUKI who had patiently endured my long absence from my home. I am grateful to her increasing support, courage and understanding which itself was unspoken inspiration to me to complete this work.

I would like to thank a number of individuals who had great contribution towards the study. Ms. Amala Thakuria for her flawless translation of the interview schedule, and Mr. Tarun Gayan for his handsome press work. Mr. Ananta Phukon, Pulok Gohain, Dharani Devi and Gunakanti Gohain had their share of valuable contribution during the period of data collection.

This study would not have seen the light of the day had it not been for the blessings of my mother Smti. Nirupoma Saikia, and patience, fortitude, gestures and understanding from my siblings Leen, Babul, Ratul and Bhanti.

A word of credit and gratefulness to Mr. C.S. Sankara Subbaian for his emblazoned work in typing this manuscript. Also the concern shown by Mr. Anbazhagan, Lecturer, VCON, is hereby acknowledged.
Finally, my profound gratefulness to all the authorities of the Drug Deaddiction centres for their extension of help. My profound appreciation to the alcoholic patients who shared their personal stories so candidly. Without their voices, this study would have been only a theory and a pipe dream.

MRIDULA SAIKIA KHANIKOR
