Acknowledgements

I bow in reverence to the almighty God who in benign benediction gave me the required fervor to complete this work successfully.

I am deeply grateful to my research supervisor Prof. Mukhtar A. Khan who accepted me as his Ph.D. student without any hesitation when I presented him my research proposal. During more than a decade of knowing him, he has inspired me to see life and science in their full depth and taught me how to pursue the good scientific work that helps other researchers to build on it. His understanding, encouraging and personal guidance have provided a good basis for the present thesis.

I would like to express my deep and sincere gratitude to my supervisor Dr. P.K. Singh. He has taught me how good experimental work is done. I appreciate all his contributions of time, ideas, and funding to make my Ph.D. experience productive and stimulating. The joy and enthusiasm he has for his research was contagious and motivational for me even during tough times in the Ph.D. pursuit. I am also thankful for the excellent examples he has provided as a successful researcher.

I sincerely appreciate the Chairman, Department of Zoology, Prof. Irfan Ahmad for his kind cooperation during my Ph.D programme.

I owe my most sincere gratitude to Professor Y.J. Chabal and his research group, who invited me as a visiting scholar to work with them in the Laboratory of Surface Modification, at Rutgers University, New Jersey, USA. I am obliged to him for providing his crucial contribution and unflinching encouragement which were very fruitful for shaping up my ideas and research.

My warm thanks are due to Professor Daman Saluja, Director, Dr. B.R Ambedkar Center for Biomedical Research, University of Delhi, New Delhi. Her kind support and guidance have been of great value in this study.

I am indebted to Mr. Rajiv Mathur, Head, Periodicals, NISCAIR, New Delhi for his essential assistance in reviewing this thesis and providing me untiring help during my difficult moments.

I am indebted to Dr. Mohanlal who helped me to initiate this work. My special gratitude to Prof. Iqbal Parvez, Prof. S.M. Abbas Abidi, Dr. Govind, Dr. Shaliesh N. Narayan, Dr. Sanjay Srivastav and Dr. Vandana for their guidance in understanding various techniques and discussion without their support this work cannot be accomplished.
I would also acknowledge my colleagues Dr. Shabi Fatima Abidi, Ms. Pooja Sharma, Ms. Neha Batra, Dr. Sanjay Kumar, Mr. Dinesh Kumar, Mr. Firoz and Ms. Jyoti Zack for their excellent friendship, valuable discussions, for creating pleasant work environment and also for the exchange of valuable scientific ideas. Their co-operation and the moments we spent together will never fade away from my memories. I am also grateful to Mr. Mohammed Ali for encouraging me to successfully complete this work.

My boundless gratitude is to my parents and family for their much needed support, patience, understanding and encouragement in every possible way.

I would like to thank National Physical Laboratory, New Delhi and Council of Scientific and Industrial Research for providing me Senior Research fellowship. The financial support from Rutgers, The State University of New Jersey, USA is gratefully acknowledged.

Shalini Singh
