Acknowledgements

First and foremost, I would like to thank “ALMIGHTY” the most merciful and beneficent for making this task reach to its completion.

It gives me immense pleasure to express my gratitude sincerely to respected Prof. Mohammad Shakir whose incessant encouragement, excellent guidance, gentle criticism and support from the initial to the final level enabled me to develop an understanding of the subject. I am extremely grateful to him for all his contributions of time and futuristic ideas to make my Ph.D. experience productive and stimulating. The enthusiasm he has for research was contagious and motivational for me even during tough times in the Ph.D. pursuit. I owe him once more for all that I learned and gained from him. Without his gentle consideration this work would not have been a reality.

I am very much indebted to my supervisor respected Dr. Farha Firdaus for her sustained interest, stimulating discussions and incisive contributions, detailed and constructive comments, and for her important support throughout this work. Her unwavering faith and extreme patience has always helped me. Her constant moral support and affectionate attitude has always kept me going through difficult times. Her painstaking efforts to help me at the cost of her personal inconvenience will always remain unforgettable.

I acknowledge the Chairman, Department of Chemistry, Aligarh Muslim University, Aligarh for providing necessary research facilities.

Help provided by the non-teaching staff of this department especially Mr. Rafaqat, Mr. Abdul Qadeer and Mrs. Tasleem are gratefully acknowledged.

Financial assistance provided by U.G.C. during the research work is highly acknowledged.

I would like to mention the following personalities with great pleasure for their contribution in the compilation of my research work: Dr. Asad U. Khan, Department of Biotechnology, Dr. Abdul Latif and Dr. Sumbul Rehman, Department of Ilmul Advia, Faculty of Unani Medicine, A.M.U., Aligarh. I am obliged to my seniors Dr. Mohammad Azam, Dr. Sultana Naseem and Dr. Kaneez Fatma for their kind cooperation and persistent support throughout.
would like to thank my lab colleagues Ms. Iram, Mr. Adil, and Mr. Faraaz for creating a congenial atmosphere in the lab.

From the bottom of my heart, I would like to thank my friends Mrs. Naushaba Sami, Mrs. Nida Shahid, Ms. Sadaf Afrin, Ms. Nazreen Khan, Ms. Fouzia Khurshid, and Ms. Amreen Abbasi for helping me get through the difficult times, and for all the encouragement, emotional support, camaraderie, entertainment, and care they provided. They will always remind me of the wonder companionship rendered by them in the time of crisis.

My heartfelt thanks to my roommate Ms. Aliya Yusuf who gave me untiring help during my difficult moments.

Finally, I want to offer my gratitude with great honour and respect to my beloved parents whose prayers have proven beacon for the ship of my carrier. I would like to thank my parents, whose inspiration has been a pillar of strength in my life. It is because of their extraordinary will, efforts, innumerable sacrifices, encouragement and blessings that I am able to complete this thesis. Their unbounded love and support have always maintained my enthusiasm throughout research work.

It is indeed privileged to put on record the inspiration and support I received from my elder brother Mr. Junaid Khan. He always boosted me in time of distress and despair with his sharp sense of humour. I am greatly indebted to my sisters Mrs. Saima Khan and Ms. Sadaf Khan for their unconditional love, tireless cooperation and emotional support which was immensely needed to complete this work.

Sadiqa Khanam
