ACKNOWLEDGEMENT

First and above all, I am ever grateful to God, the Creator and the Guardian, and to whom I owe my very existence.

I would like to express my deepest appreciation to my research supervisor Dr. A Ishwara Bhat for his wise guidance and encouragement throughout this study. He provided not only an excellent opportunity to expand my academic knowledge, but also a great environment to learn various experimental techniques of molecular biology and tissue culture.

I express my deep gratitude to The Director, IISR for permitting me to carry out this work at the Indian Institute of Spices Research, Calicut.

I express my warm and sincere thanks to Dr. Devasahayam, Head, Division of Crop Protection, IISR for providing facilities, support and encouragement.

I wish to express my warm and sincere thanks to Dr. R Ramakrishnan Nair, Senior Scientist, IISR for his timely advice and untiring help during my difficult moments of black pepper regeneration.

I extend my sincere thanks to Dr. Chandrasekhar, Professor and Chairman, Department of Applied Botany, Mangalore University for admitting me as PhD scholar in the Department of Applied Botany at Mangalore University.

I warmly thank Dr. M Anandaraj, Project Coordinator (AICRP on Spices), Dr. B Chembakam, Head Division of Crop Production and Post Harvest Technology, Dr. B Krishnamurthy, Head, Division of Crop Improvement and Biotechnology and Mr. P A Mathew, Scientist in charge, Experimental Farm, Peruvannamuzhi for their timely help, support and encouragement.

I am grateful to Dr. Utpala Parthasarathy, HRD Secretary, IISR for the kind concern and help during the period.

I would like to express my appreciation to scientists at IISR, especially, Dr. T K Jacob, Dr. Santhosh Eapen, Dr. A Kumar, Dr. Suseela Bhat, Dr. Rashid, Dr. Nirmal Babu, Dr. Johnson K George, Dr. John Zachariah, Dr. B Sasi Kumar, and many for their pleasant gesture and support.

I thankfully acknowledge the help and support extended by the staff of DISC, IISR for constant access to internet and bioinformatics tools and IISR library for being a rich source of information.

I thank all my departmental colleagues and friends especially Aravind, Anoop, Asish, Anupama Bini, Bhadramurthy, Cisun, Dinsha, Dinu, Elizabeth, Hareesh, Martin, Pramod, Prameela,
Retheesh, Renu, Sandeep, Sangeeth, Sayuj, Sheji, Sibi, Siju, Siljo, Surabhi, Sumathi, Vijesh, Vineetha, Vinod and Yamuna their friendships and constant support

The funding and research fellowship by Department of Biotechnology, Government of India is thankfully acknowledged.

Finally, my deepest gratitude goes to my husband, for his endless love, for consistently supporting me and encouraging me to overcome difficulties and to reach success. Without his encouragement and understanding it would have been impossible for me to finish this work. I would also like to give my deep appreciation to my parents, sister and in laws for their inseparable support and prayers.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Jiby Mary Varghese
