ACKNOWLEDGEMENT

This thesis could never have been presented had it not been for the aid and encouragement that the author has received from many sources. The author wishes to express his obligation to all those who have helped him, and especially to:

- the Registrar, and the Faculty of Engineering, of the University of Poona,
  who, after the attempts to obtain an official guide who would counsel the author in his research proved fruitless, there being no guides in this subject on the panel, allowed him to carry out his investigations and to prepare his thesis independently of a guide.

- Dr. K.L. Rao, and Major B.H. Marley (ex-Principal of the College of Engineering, Guindy, Madras)
  who, early on, spent some effort in recommending the names of prospective guides.

- the late Dr. Karl Terzaghi; M.Y. Guyon; Prof. F. Leonhardt (Stuttgart University); Dr. J.P. Stott (Road Research Laboratory, U.K.); Mr. Carl F. Clausen and Mr. W. Burr Bennett (Portland Cement Association, USA); Prof. C.B. Morice (Southampton University); Mr. B. Clark (Leeds University); Prof T.Y. Lin (University of California);
Dr. Bh. Subbaraju and Dr Ghosh (Central Road Research Institute, India); Mr. B.J. Walker, Mr. R.A. Keen and Mr. D. Palmer (Cement and Concrete Association, UK); the late Mr. Fred Burggraf and Mr. F.N. Wray (late Director, and Engineer of Design, respectively, of the Highway Research Board, USA); Mr. Samuel J Henry (American Concrete Institute, USA); Mr. Paul A Parisi and Mr. William D. French (American Society of Civil Engineers, USA); Mr. Nils Peterson (Swedish Cement and Concrete Research Institute, Sweden); Dr. V.V. Subrahmaniam (IIT, Kharagpur); M. Fickelson (of RILEM, France); Mr Delmar L. Bloem (National Ready Mixed Concrete Association, USA); Mr. R.J. Hammersmith (Prestressed Concrete Institute, USA); Mr. Bruce Anderson (Alpha Portland Cement Co, USA); Mr. James P. Sale and Mr. Phillip L. Mellville (Asst Chief, R & D, and Civ. Engr-Airfields Branch, respectively, Office of the Chief of Engineers, & Dept of the Army, USA); Colonel Gardner A. Williams and Major Elidio J Honoriti (US Army, Corps of Engineers); Prof Yutaka Osawa (Tokyo University); Mr. E.F. Schaack (John A. Roebling's Sons. Co., USA); Mr, Kenneth E. Dixon (The Preload Co. Inc., USA); Mr. S. Kovanyko (Freyssinet Co. Inc., India); Dr. P.C. Verghese (IIT, Madras); Dr. K.E. Sundararaja Iyengar (Indian Institute of Science, Bangalore); and officials of the American Society for Testing and Materials, and of the British Standards Institute,
all of whom courteously replied to the letters that the
author addressed to them on the subject of prestressed
concrete pavements, and who either furnished him with
valuable comments on his work, or who took the trouble of
referring him to papers on the subject.

Mrs. Pamela Garner, of California, USA,
who arranged the computational check on the
relevant portions of the work.

the Engineer-in-Chief, Corps of Engineers; the Commandant,
College of Military Engineering; and the GSO-1, College
of Military Engineering;
through whose understanding and consideration the
author's tenure of duty at the College of Military
Engineering was extended to enable him to complete
this thesis.

the Director, Military Engineer Experimental Wing,
who bolstered his Assistant Director with an
enormous amount of encouragement.

Mr V.G. Sose, Mr. D. Phatak, and Mr. Y. Kamte, of the
staff of the Military Engineer Experimental Wing,
who assisted the author tremendously in his
experimental work, and in making the various
compilations of results.

typists Mrs. Anand, Mrs. George and Mr. P Mani, and
draughtsmen Mr. U.V. Bhinde, and Mr. O Daniel,
who set the record right.

For all their assistance, the author is very appreciative;
and to all of them, he is extremely grateful.
