ACKNOWLEDGEMENTS

I consider it a privilege to work under the guidance of Dr P.K. Ranjekar. His continued encouragement and faith in my abilities has helped me to set higher goals for myself and achieve all that I have been able to. He has not only been a guide but a mentor too.

I am extremely grateful to Dr Vidya S. Gupta for her untiring help, guidance, encouragement and keen interest in my work. She has rendered a patient ear to all my problems and has always strived to help me solve them.

I would like to express my sincere thanks to Ramakrishna, Venkat and Anjali for their invaluable help and advice throughout the tenure of my work. I have learnt a lot from my association with them for which I am deeply indebted.

I especially wish to acknowledge the help rendered by Bhushan and Rahul at all times. I am exceedingly lucky to have friends like Aditi, Aparna, Swati and Vrinda who have always boosted my morale especially in times of difficulty.

I would like to thank all my friends and lab-mates – Arohi, Abhay, Ajay, Ajit, Aparna Deshpande, Archana Damle, Archana Deshpande, Arundhati, Ashok Aspatwar, Ashok Giri, Ashwini, Mr B.G. Patil, Bimba, Dipak, Gauri Apte, Gauri Bhat, Jakir, Juri, Kanchan, Dr Lalitha, Manasi, Maneesha, Manisha, Medhavinee, Meena Arvindakshan, Mikhil, Milind, Monali, Mukund, Dr Nirmala, Pavan Prakash, Prachi, Rajesh, Rajsehkar, Raju, Rakhee, Rangarajan, Rashmi, Renu, Renuka, Ritika, Sami, Sanjay, Sastry, Shashi, Dr Shubhada, Smita, Suresh, Trupti, Varsha and Vijay for the lively atmosphere maintained in the lab.

I am grateful to Dr Meena Lagu, Dr Mohini, Suvarna and Sadhana for their help at all times. They have always tried to make available all the chemicals enzymes, etc required for my work. I am also thankful to Indira, Usha and Satyali for the help rendered by them.

I would also like to mention Mr Modak, Mr Kamthe, Mr Trehan and Mr Karanjkar for their technical help with instrumentation. Thanks are also due to Karunakaran, Jagtap, Mari, Kamble and Shikhre for their assistance.
I would like to thank Dr Paul Ratnasamy, Director, National Chemical Laboratory for providing the laboratory facilities during the tenure of my work. I acknowledge the financial support from Council of Scientific and Industrial Research, New Delhi in the form of Junior and Senior Research Fellowships. My work has mainly been supported by the grant from Rockefeller Foundation, USA, to whom I express my gratitude.

I would like to acknowledge Dr N.P. Sarma and Dr A.P.K Reddy, Directorate of Rice Research, Hyderabad, for making available the elite cultivars and bacterial blight resistant and susceptible genotypes of rice, respectively. I am grateful to Dr D.S. Brar for providing DNA of wild rice genera from the germplasm collection at International Rice Research Institute, Manila, Philippines. I also wish to thank Central Rice Research Institute, Cuttack, India, Agricultural Research Station, Vadgaon, India, USDA ARS, National Small Grains Collection, Aberdeen, USA, Indian Agricultural Research Institute, New Delhi, India and Agharkar Research Institute, Pune, India for providing genotypes of rice and other cereals. I am indebted to Dr Shiv Kumar Aggarwal for providing the coefficient of parentage data for the elite rice cultivars used in my work. The invaluable discussions with Dr Bapat and Prof E.A. Siddiq have been a tremendous help in planning my work. I especially wish to mention Prof M.V. Hegde, who is instrumental in initiating me into the field of molecular biology.

I would like to acknowledge all my teachers, friends, relatives and well-wishers who have helped me a different times but whose names I have been unable to mention here. I wish to express my heartfelt gratitude to my parents, parents-in-law, brother Pettarusp and sister Piloo for their unstinting support and encouragement which has egged me on throughout my work. I am at a loss for words to thank my father whose invaluable advice I have always sought in times of need. Mere words are insufficient for the understanding and patience shown by my husband Piroze during the last four years, without whose continuous support and encouragement my thesis would not have seen the light of day.

Armaity Davierwala
