1 INTRODUCTION AND DESIGN OF THE STUDY	1
1.1. Overview	1
1.2. Definition of Remote Sensing	1
1.2.1. Fundamentals of Remote Sensing	2
1.3. Effects of Atmosphere and Statistics Dispensation	3
1.4. Types of Remote Sensing Descriptions	4
1.4.1. Remote Sensing Images	4
1.4.2. Optical and Infrared Remote Sensing Images	5
1.4.3. Thermal Remote Sensing Images	5
1.4.4. Microwave Remote Sensing Images	6
1.5. Stages in Remote Sensing Metaphors	7
1.5.1. Source of Energy	8
1.5.2. Interaction of EMR with the Atmosphere	8
1.5.3. EMR Interaction with Earth Features	8
1.5.4. Detection of EMR by the Remote Sensing Sensor	8
1.5.5. Data Transmission and Processing	8
1.5.6. Image Processing and Analysis	9
1.5.7. Application	9
1.6. Practices of Remote Sensing Imagery Data	9
1.7. Excellence Features of Remote sensing Data	10
1.7.1. Spatial Resolution	11
1.7.2. Spectral Resolution	11
1.7.3. Radiometric Resolution	12
1.7.4. Temporal Resolution	13
1.7.5. Radiometric Correction	13
1.8. Principles of Object Identification of Remote Sensing	14
1.9. Characteristics of Remote Sensing Images	15
1.10. Geometric Distortion in Remote Sensing Image	17
1.11. Processing of Remote Sensing Images	18
1.12. Applications of Remote Sensing	19
1.13. Motivation	20
1.14. Objectives	20

1.15.	Scope of the Study	22
1.16.	Organization of the Thesis	23
1.17.	Conclusion	25
	References	25
2	OVERVIEW OF RSI CLASSIFICATION	27
2.1.	Introduction	27
2.2.	Remote Sensing Image Classification Process	27
	2.2.1. Selection of Remotely Sensed Data	27
	2.2.2. Selection of Classification System and Training Samples	28
	2.2.3. Image Preprocessing	28
	2.2.4. Feature Extraction and Selection	29
	2.2.5. Selection of a Suitable Classification Method	29
	2.2.6. Evaluation of Classification Performance	30
	2.2.7. Classification Accuracy Assessment	30
2.3.	Standard Approaches of Image Classification Algorithms	31
	2.3.1. Simulation Technique of Remote Sensing Data	31
	2.3.2. Accuracy Assessment Methods	31
	2.3.3. Supervised Classification Algorithms	32
	2.3.4. Unsupervised Classification Algorithms	32
	2.3.5. Classical Statistical Methods	32
	2.3.6. Image Classification Based on Multi-level Neural Networks	33
	2.3.7. Classification Tree Analysis	33
	2.3.8. Continuous K-means Clustering Algorithms	34
2.4.	Challenges in Remote Sensing Image Classification	34
2.5.	Training and Prediction of Remote Sensing Classification	35
2.6.	Review of Related Literature	36
2.7.	Conclusion	63
	References	63
3	THRESHOLDING APPROACHES FOR RSI CLASSIFICATION	65
3.1.	Introduction	65
3.2.	Thresholding Technique	66
3.3.	Finding Peaks and Valleys	68
3.4.	Thresholding Preliminaries	69

3.5.	Different Perspectives of Thresholding	71
3.5.1.	Histogram Shape-based Method	71
3.5.2.	Clustering-based Method	71
3.5.3.	Entropy-based Method	71
3.5.4.	Object Attribute-based Method	72
3.5.5.	Spatial Method	72
3.5.6.	Local Adaptive Method	73
3.5.7.	Automatic Thresholding Method	73
3.5.8.	Hysteresis Thresholding Method	73
3.5.9.	Optimal Thresholding Method	74
3.8.	Proposed Local Thresholding Method For Remote Sensing Image	74
3.8.1.	Proposed LTM Algorithm	76
3.8.2.	Advantages	77
3.8.3.	Disadvantages	77
3.8.4.	Experimental Results	78
3.8.5.	Performance Evaluation	79
3.9.	Dynamic Global Thresholding Method For RSI Classification	82
3.9.1.	Global Gray Scale Thresholding	82
3.9.2.	Global Color Thresholding	83
3.9.3.	Dynamic Global Threshold Method	85
3.9.4.	Flowchart	86
3.9.5.	Advantages	87
3.9.6.	Disadvantages	87
3.9.7.	Experimental Results	88
3.9.8.	Performance Evaluation	89
3.10.	Interactive ATM For RSI Classification	90
3.10.1.	Adaptive Thresholding Approaches for Simple Features	91
3.10.2.	Adaptive Thresholding Approaches for Colour Features	92
3.10.3.	Proposed Interactive Adaptive Thresholding Method	93
3.10.4.	Methodology	94
3.10.5.	Experimental Results	97
3.10.6.	Performance Evaluation	98

3.11.	Discussions	101
3.12.	Conclusion	102
	References	103
4	FEATURE BASED EFFECTIVE K-MEANS CLUSTERING METHOD IN RSI CLASSIFICATION	107
4.1.	Introduction	107
4.2.	Common Procedure for Classification and Clustering	108
4.3.	Different Perspectives of Clustering Method	109
	4.3.1. Hierarchical Clustering Method	110
	4.3.2. Non-hierarchical Clustering Method	110
	4.3.3. Threshold-based Clustering Algorithm	111
4.4.	Clustering Terminologies	112
4.5.	Standard K-Means Clustering Method	114
4.6.	Broad Spectrum of K-Means Clustering	115
	4.6.1. Developments	116
	4.6.2. Vector Quantization	116
	4.6.3. Cluster Analysis	117
	4.6.4. Feature Learning	117
	4.6.5. Merits	117
	4.6.6. Demerits	118
4.7.	Proposed Modified K-Means Clustering Algorithm For RSI	118
4.8.	Relative Error Measure Factor	121
	4.8.1. Cluster Error Measurable Factor	121
	4.8.2. Cluster Error Determination Factor	122
4.9.	Experimental Result	123
4.10.	Performance Evaluation Matrices	125
4.11.	Comparison Graph for Test Scores Clustering	128
4.12.	Discussions	129
4.13.	Conclusion	130
	References	131
5	RELATIONAL AND IDENTICAL FEATURES OF RSI CLASSIFICATION USING PCA METHOD	133
5.1.	Introduction	133
5.2.	Estimation of PCA in Remote Sensing Image Analysis	135
5.3.	Statistical Background of PCA	137
	5.3.1. Band Transformation	137

5.3.2.	Object Recognition	138
5.3.3.	Classification	138
5.3.4.	Image Features	139
5.3.5.	Feature Learning	139
5.3.6.	Training Classifier	140
5.4.	Innovative Technique of PCA	140
5.4.1.	Four Stage PCA Classification	141
5.4.2.	Graphical Representation of PCA	141
5.4.3.	Terminologies	142
5.4.4.	Schematic Diagram	143
5.4.5.	Methodology	144
5.4.6.	Advantages	145
5.4.7.	Disadvantages	145
5.4.8.	Estimation Factor of PCA	146
5.5.	Experimental Results	147
5.6.	Performance Evaluation Matrices	149
5.7.	Comparison Graph For Test Scores PCA Bands	151
5.8.	Discussions	153
5.9.	Conclusion	154
	References	155
6	FAST AND EFFICIENT FUZZY C-MEANS CLUSTERING FOR REMOTE SENSING IMAGE CLASSIFICATION	158
6.1.	Outline of FCM Clustering	158
6.2.	Introduction	159
6.3.	Clustering Approaches	160
6.3.1.	Fuzzy Clustering	161
6.3.2.	Innovations of Centroids Initialization	162
6.4.	Remote Sensing Image Classification Based on Fuzzy Techniques	165
6.5.	Extension of Feature Space of Fuzzy C-Means	168
6.6.	Methodology	170
6.6.1.	Standard FCM Classification Algorithm	170
6.6.2.	Proposed FEFCM Classification Algorithm	172
6.6.3.	Flowchart	173
6.7.	Advantages	174
6.8.	Disadvantages	175

6.9.	Fuzzy Cluster Evaluation Functions	175
6.10.	Nonlinear Objective Assessment Parameters	176
6.10.1.	Vitality Factor (VF)	177
6.10.2.	Absolute Entropy (AE)	177
6.10.3.	Distinct Entropy (DE)	177
6.10.4.	Classification Accuracy	177
6.11.	Experimental Results	178
6.12.	Performance Evaluation	179
6.13.	Comparison Graph For Test Scores FCM Clustering	181
6.14.	Discussion	183
6.15.	Conclusion	184
