ACKNOWLEDGMENT

Thanks God, finally I am here, writing the acknowledgement. I owe Almighty for “HIS” benevolent blessings that steered me through the course of my work to this stage.

I gratefully acknowledge Dr. K. Senthamarai Kannan, Professor and Head, Department of Statistics, Manonmaniam Sundaranar University, Tirunelveli, for his advice, supervision, and crucial contribution, which made him a backbone of this research and so to this thesis. His involvement with his originality has triggered and nourished my intellectual maturity that I will benefit from, for a long time to come.

Above all, I would like to record my gratitude to Dr. N. Krishnan, Professor and Head, Centre for Information Technology and Engineering, Manonmaniam Sundaranar University, Tirunelveli for his supervision, advice, and guidance from the very early stage of this research as well as giving me extraordinary experiences through out the work. Moreover and the most needed, he provided me unflinching encouragement and support in various ways. His truly scientific intuition has made him as a constant oasis of ideas and passions in Engineering, which exceptionally inspire and enrich my growth as a human being, a student and a researcher. It is a pleasure to express my gratitude wholeheartedly to his family for their kind hospitality extended to me during my research discussion visits. I am indebted to him more than he knows.

Prof. Dr. R. Maruthukutti, Research Co-ordinator, Manonmaniam Sundaranar University, helped me to clear through all the official procedure in the course of the research to the final stage of submission. All routine formalities to me happened in incredible time for which I am sincerely indebted to the Research Co-ordinator.
Many thanks go in particular to Mr. F. Deepan Cross. I am much grateful to him for his valuable suggestions in subject matters, who always kindly grant me his time for answering all my questions about Professional Financial Engineering practices.

I thank the funding agency Money Tick Inc., USA for supporting this research on the Technical Analysis of Financial Time Series data for the project "Data Mining to Predict Financial Markets Using Quantitative Analysis" under grants No.P&D1/CIT/NK/DMPFM/OM through the Centre for Information Technology and Engineering, Manonmaniam Sundaranar University, Tirunelveli.

I would also acknowledge Prof. Seldev Christopher, Prof.R.K.Selvakumar, Prof.A.Leninfred, Prof.S.Ravi, for their advice and their willingness to share their bright thoughts with me, which were very fruitful for shaping up my ideas and research. Thanks are due to Mr. P. Arumugam, Research Scholar, Department of Statistics, Manonmaniam Sundaranar University, for the timely help in getting the matters done in various sections of the University. I express my special thanks Mr. P. Kumar, Centre for Information Technology and Engineering, Manonmaniam Sundaranar University, for his genuine support throughout this research work.

I thank the Doctoral Committee members Dr.A.Loganathan, Department of Statistics, Manonmaniam Sundaranar University and Dr.R.S.Rajesh, Department of CSE, Manonmaniam Sundaranar University for their valuable contributions during the course of this research work. I owe a special thanks to my good friend and Doctoral Committee member Dr.A.Loganathan for his valuable suggestions to take up the research very well. Also I thank the friendly Professor and my well wisher Dr. Mohammed Sadiq of Sadakathullah Appa College, Tirunelveli.
I am extremely grateful to my parents for their love, prayers, caring and sacrifices for educating and preparing me for my future. My Father in the first place is the person who imparted human values to me and shaped my learning characters, showing me the joy of intellectual pursuit ever since I was a child. But for him, I would not have entered into this Ph.D., research career; His constant interest made him to talk to Dr.N.Krishnan on Ph.D., work, who in turn requested Dr.Senthamarai Kannan to grant me Ph.D., admission and the rest is this dissertation. Had he been alive, he would have been a much delighted person. I submit all the intellectual credits to my beloved father. My Mother is the one who sincerely raised me with her caring and gentle love. I am very much thankful to my wife Ms. S. Sasipriya and my son K. Mithun for their love, understanding, prayers and continuing support to complete this research work. I owe her for being unselfishly let her intelligence, passions, and ambitions collide with mine. Also I express my thanks to my sister, brother in laws, father and mother in laws for their love and prayers.

I am extending my thanks to the M.Tech., students and fellow faculty members of Centre for Information Technology and Engineering, Manonmaniam Sundranar University, Tirunelveli for their support during my research work. I also thank all the staff of Research section of Manonmaniam Sundranar University, Tirunelveli for their kindness.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

M. KARTHIKEYAN
