ACKNOWLEDGEMENTS

If we supply the willingness, GOD supplies the power

I deem it my privilege and honour to place and record my gratitude and indebtedness to the following without whose guidance, support and concern I would not have been able to complete my Ph. D thesis.

I feel privileged to express my deep sense of reverence and gratitude to my revered mentor, Dr. Girji Dey, for her support, immaculate guidance, constructive criticism, constant encouragement and providing requisite facilities to carry out my research which otherwise would have remained incomplete. Her nurturing and caring concern has been a stimulus which I will always cherish. I also appreciate her untiring efforts during the entire tenure of my research work and patience during writing of this thesis. I have no words to express my gratitude for everything she has contributed in my Ph. D and without her blessings it was surely impossible for me to finish my work. I thank her from bottom of my heart.

I emphatically express my loyal and venerable thanks to Dr. Y. Medury (COO, Jaypee Education System) and Brig. (Retd.) Balbir Singh (Director, JUIT) for providing opportunity to pursue a Doctorate Degree, teaching assistantship and advanced lab infrastructure to accomplish this scientific venture of my life. It gives me immense pleasure to express my gratitude to Brig. Sir for his ever smiling disposition coming to my rescue in solving my problems and suggestions which helped me in maintaining my confidence.

I am very much grateful to Dr. Ravi Prakash (Vice Chancellor, JUIT) and Prof. T. S. Lamba (Dean, JUIT) for their valuable guidance, constant support and cooperation.

I gratefully acknowledge the help rendered by Prof. R. S. Chauhan (HOD, Dept. of BT & BI) for his encouragement, timely help and cooperation throughout my research work.

I also feel indebted to my former advisor, Professor M. P. Bansal (Department of Biophysics, Panjab University, Chandigarh) for his valuable advice, unconditional support and providing me the research facilities available in his Department and I am also thankful to Ms. Rajdeep Kaur of the same department for her co-operation during the conduct of in vivo studies.

I am grateful to Australian Government (Department of Industry, Innovation, Science, Research and Tertiary Education) for the award of Endeavour Research Fellowship during my Ph.D. research.
I would like to convey my special sincere gratitude to Professor N. P. Shah (School of Biological Sciences, The University of Hong Kong, Hong Kong) for his valuable guidance and sustained support during my Endeavour Award tenure. My heartfelt thanks to Mutamed Ayyash and Laxmi N. Prasad (PhD students at Victoria University, Melbourne, Australia) for their unconditional support and scientific advises as and when required.

This document would have remained an infant had it not received its necessary ‘diet’ in the form of comments, suggestions etc. by Dr. Pradeep Kumar Naik, Dr. Harvinder Singh, Dr. Hemant Sood and Dr. Gunjan Goel. I am short of words in expressing my thanks to them, for their innovative ideas that shaped this document.

I wish to convey my sincere thanks to all the faculty members of Department of Biotechnology and Bioinformatics, for their help and guidance at the various stages of this study.

I am also thankful to all the members of technical and non-technical staff of the department, especially Mrs. Somlata Sharma, Mrs. Mamta, Mr. Ravikant, Mr. Baleshwar and Mr. Kamlesh for their assistants and valuable contributions.

I am fortunate to have friends who have always stood beside me. I extend my heartfelt thanks to Soby, Neetu, Charu, Seneha, Tananna, Parul, Kritika, Jatin, Pandit and Krishna Sir for their sustained support and ever needed cooperation. I also thanks to Renu, Moni, Sukanya, Dimpy, Dolly and Dora for their inspiration and sincere friendship all throughout my life.

It is my pleasure to express my gratitude to all research scholars of the Biotechnology & Bioinformatics Department for keeping me blessed with best wishes.

It is worthwhile expressing my gratitude to Dr. Binoy Sarkar and Ms. Akanksha Ghandhi who provided me paid journal papers as soon as requested.

The purpose of this acknowledgement will be incomplete if I fail to appreciate the moral support and encouragement rendered by my family and my fiancée, Tashi. I can hardly able to express my love to my sweet niece “Jaynie” whose innocence refreshed me during my difficult times. The successful culmination of this thesis could not have been possible without the blessing of my loving parents. Without their help I would have been greatly incapacitated.

All may not be mentioned, but no one is forgotten.

Bharti Negi
