	Page No.
I. GENERAL INTRODUCTION	1-30
II. GENERAL MATERIALS AND METHODS	31-47
CHAPTER- 1	
1.1 Introduction	
1. 1. 1. Importance of Protein, Lipid and Carbohydrate in Fish Maturation	48-50
1. 1. 2. Lipid Requirement during Maturation	50-52
1. 1. 3. Importance of Carbohydrate for Gonad Maturation	52-53
1. 1. 4. Induced Breeding by Hormonal Manipulation	53-55
1. 1. 5. Bacterial Clearance	55-57
1.2 Materials and Methods	
1. 2. 1. Experimental Groups	58
1. 2. 2. Maintenance of Brooders	58
1. 2. 3. Primary Screening	58
1. 2. 4. Secondary Screening	59
1. 2. 5. Induced Maturation by Hormone Administration	59-60
1. 2. 6. Preparation of Tissue for Biochemical Analysis	60
1. 2. 7. Preparation of Blood for Biochemical Analysis	60
1. 2. 8. Bacterial Clearance	61
1. 2. 9. Phagocytosis	61-62
1. 2. 10. Coagulase Assay	62
1. 2. 11. Intracellular Superoxide Anion (NBT Reductase Assay)	62-63
1. 2. 12. Immunological Parameters	63
1. 2. 13. Preparation of Liver for Biochemical Analysis	63
1. 2. 14. Preparation of Gonad for Biochemical Analysis	63-64
1. 2. 15. Lipid Estimation	64
1. 2. 16. Estimation of Protein	65-66
1. 2. 17. Estimation of Carbohydrates	66
1. 2. 18. Spawning	67
1. 2. 19. Determination of Egg Size	67

1. 2. 20. Fecundity	67
1. 2. 21. Percentage of Egg Fertilization	67-68
1. 2. 22. Percentage of Normal and Abnormal Embryo Development	68
1. 2. 23. Hatching	68-69
1. 2. 24. Larval Rearing	69-70
1.3 Results	71-85
1.4 Discussion	86-95
1.5 Summary	96-98

CHAPTER- 2

2.1 Introduction	
2.1.1. Reproductive Biology of <i>E. suratensis</i>	99
2.1.2. Role of Hormones in Fish Reproduction	99-100
2.1.3. Gonadotrophin Releasing Hormones (GnRH)	100
2.1.4. Human Chorionic Gonadotrophin (HCG)	101
2.1.5. Luteinizing Hormone Releasing Hormone (LHRH)	101
2.1.6. Ovaprim	101-102
2.1.7. Male and Females of <i>E. suratensis</i>	102-103
2.1.8. Stages of Maturity in <i>E. suratensis</i>	103-104
2.1.9. Gonado Somatic Index (GSI)	105
2.1.10 Role of Gonadotropins in Gametogenesis	105
2.1.11 Background Information of the Present Study	106
2.2 Materials and Methods	
2.2.1. Hormone Profiles	107-108
2.2.2. Experimental Setup	108-109
2.2.3. Milt Collection	109
2.2.4. Sperm Quality Assessment	109-111
2.2.5. Maturation Assessment and Selection of Brooders	111-112
2.2.6. Coloration and Reproductive Readiness	112
2.2.7. Determination of Testosterone Level	112
2.2.8. Determination of Estradiol Level	112
2.3 Results	114-125
2.4 Discussion	126-141
2.5 Summary	142-144

CHAPTER- 3

3.1	Introduction	
	3. 1. 1. Need for Herbal Maturation Diet	145-146
	3. 1. 2. Bad Effect of Hormones	146-147
	3. 1. 3. Role of Herbal Active Principles in Reproduction on Animals	147-148
	3. 1. 4. Role of Herbal Active Principles on Biochemical Composition of Animal Body	148-150
	3. 1. 5. Effect of Herbal Active Principles on Larval Quality	150-152
3.2	Materials and Methods	
	3. 2. 1. Taxonomic Description of the Selected Herbals	153
	3. 2. 2. Herbal Application	153-154
	3. 2. 3. Selection of Suitable Herbals	154-156
	3. 2. 4. Purification of Selected Active Extracts	156-157
	3. 2. 5. Artificial feed preparation and Feeding	157
	3. 2. 6. Steroid Hormone Analysis	157
3.3	Results	158-170
3.4	Discussion	171-190
3.5	Summary	191-193

CHAPTER- 4

4.1	Introduction	194-196
4.2	Materials and Methods	
	4. 2. 1. Egg Incubation in Larval Rearing Tanks	197
	4. 2. 2. Measurement of Morphometric Parameters in Larvae	197-198
	4. 2. 3. Bacterial challenge	198
	4. 2. 4. Chemical Challenge Study	198-199
	4. 2. 5. Larvae and Salinity Tolerance	199
	4. 2. 6. Estimation of Chemical Content in Yolk-sac of <i>E. suratensis</i> Larvae	199
4.3	Results	201-209
4.4	Discussion	210-218
4.5	Summary	219-221
III	CONCLUSION	222
