DEDICATED
TO
MY AMMA
ACKNOWLEDGEMENTS

I would like to express my deepest appreciation to my research supervisor, Dr. A. Nagendran, for his supervision throughout the process of this research. His guidance and encouragement have fostered independent thinking and individual initiative, yet he has always been available for consultation. I am very grateful to him for his personal interest, attention and care shown to me in shaping my carrier. It has been an honor to be his first Ph.D. scholar.

It is my profound privilege to express my feelings of gratitude and thanks to my doctoral committee members, Dr. G.N.K. Ramesh Bapu, Senior principal scientist, CECRI, Mrs. G. Vasanthi, Head of the Department, PG & Research Department of Chemistry and Dr. A. John Rethinam for their valuable suggestions and thoughtful discussions for completing this dissertation. My special thanks to the Principal of Alagappa Government Arts College Dr. K. Kudalingam, for providing all infrastructure facilities to me to carry out this research. I owe my sincere gratitude to Dr. R. Jeyagopal, Former Principal, for the help rendered. I am very much thankful to Dr. E. Kumaraswamy, Principal, VSS Government Arts College, Pulankurichi for his constant support throughout my study.

My sincere recognition to Professor. D. Rana and Professor. T. Matsuura, Department of Chemical and Biological Engineering, Industrial Membrane Research Institute, University of Ottawa, Canada for their fruitful discussion and cooperation in my research work.

Many thanks go to Dr. N. Thinakaran, Dr. S. Kasthuri Bai, Dr. AN. Senthilkumar and all other faculty members of PG and Research Department of Chemistry for their constant assistance and cooperativeness over these past years.
They helped me in many ways that I cannot state here all the assistances I have got from them.

I wish to my cordial appreciation to Mr. RM. Sabarathinam, Principal Scientist, CECRI, Karaikudi, for all his help and patience in the laboratory. I specially want to thank my most cooperative and helpful colleagues Mr. P. Kanagaraj and Mrs. A. Muthumeenal for their excellent cooperation and extended support in the whole duration of research work.

I would also like to thank my mother and sister for their unconditional love and affection that I have been receiving. I cannot possibly state how much they mean to me.

All of my friends, who have been though together both good and bad times. Every single one of you helped me to accomplish this, and I'm truly glad to have you all in my life.

This work was made possible through the financial support from the University Grants Commission (UGC), Govt. of India under F.No. 41-219/2012.

I would like to thank those who gave me support at any moment and whose names are not mentioned here by any means, but contributed a lot in my goals.

finally to God, the All-Glorious, the Supreme Helper

I suppose this PhD thesis is the end product of all the years of probing, questioning and encouraging me to think problems through to a conclusion. Unfortunately, after this long period as a student I fear it is now time to enter the real world. I will try to give some good things to the academic and scientific society.

(S. NEELAKANDAN)
