Acknowledgement

First and foremost, praises and thanks to the God, the Almighty, my Parents and Family for their showers of blessings throughout my research work to complete the research successfully. My special thanks to my mom who saw start of my PhD but was unable to see me finish, I will always remember how proud I made her.

I would like to express my deep and sincere gratitude to my research supervisor, Dr Kiran S Nimavat Associate Professor, Govt. Science College Gandhinagar and Dr Kartik B Vyas Associate Professor, Sheth L.H Science College, Mansa, for giving me the opportunity to do research and providing invaluable guidance throughout this research. It was a great privilege and honor to work and study under his guidance. I am extremely grateful for what they have offered me.

It would not have been possible to do my doctoral study without the help and support of the kind people around me, to only some of whom it is possible to give particular mention here. Firstly, my big thanks go to my friends, philosophers and guide Mr. Vimal Patel and Dr. Pralav Bhatt. For their support from topic selection to thesis submission. Moreover, the Ideas you gave me as an input, whenever I had a hard time with the experiments were of my moral support. I always ended up with confidence and full of energy after the discussions with you. I inspired from you about the true research and its value, which I feel at the end very important for budding researchers like me. You always understood any issues from my point of view, and gave me full freedom and your support for all the decisions I have made. I believe from my heart that you are a true friend for a person who wants to do research and I am lucky to be one of those who had an opportunity to work with you.

Thanks for everything!!!
I would like to express my sincere gratitude to Dr. Pintoo Ganguly and Dr. Satish Mahajan for providing me motivation, enthusiasm and encouragement throughout the journey.

I would also like to thank Thavendran Govender, Hendrik G. Kruger and Glenn E. M. Maguire of University of KwaZulu-Natal, Durban, South Africa for their support of without them it would not be possible to have analytical and extensive study of the compounds.

Finally my colleagues without whom it would be very difficult to understand the ongoing activity. Thank you very much Dr. Dattatraya Mangte, Sachin pande, Digambar Bharambe, Mr. Raju Kharatkar, Dr. Ajaysingh Rawat, Dr. Divyesh Patel, Kamlesh Chauhan for providing me active support in terms of novel ideas and discussions which helped me to understand and perform so many aspects of my project.

I am extremely grateful to my parents for their love, prayers, caring and sacrifices for educating and preparing me for my future. I am very much thankful to, my wife Prachi and my sweet daughter Jency, my brother Atit and his wife Ashwina for their love, understanding, prayers and continuing support to complete this research work.

Finally, I thank all those who have helped me directly or indirectly in the successful completion of my thesis. Anyone missed in this acknowledgement are also thanked.

Thank you

Nilay Bhatt
