LIST OF FIGURES

Figure 1.1 Generic Pattern Recognition System .................................................12
Figure 1.2 Projected basic plan of Feature Selection .........................................13
Figure 3.1 Sectional diagram of human vocal apparatus, showing major articulators, resonators and features of the vocal and nasal tracts ........................................31
Figure 3.2 Schematic representation of the complete physiological mechanism of speech production ........................................................................................................32
Figure 3.3 Spectral Envelope and its Formants ..................................................40
Figure 3.4 Spectral Envelopes of two Different Speakers ....................................41
Figure 3.5 Short-Term Spectral Analysis ............................................................41
Figure 3.6 Sample Speech Signal .....................................................................42
Figure 3.7 Block diagram of MFCC extraction ..................................................43
Figure 3.8 DC Removal and Voice Activity Detection .......................................44
Figure 3.9 (a) Speech signal before silence removal .........................................44
Figure 3.9 (b) Speech signal after silence removal ............................................45
Figure 3.10 Speech signal before and after passing through Wiener Filter ........45
Figure 3.11 Frame based processing of speech data .........................................46
Figure 3.12 Hamming Window on Speech Signal .............................................47
Figure 3.13 Windows in Different Forms ............................................................47
Figure 3.14 Amplitude Retort of a group of Windows ......................................48
Figure 3.15 (a) Speech Signal x (n) of 5 msec and its DFT retort .....................49
Figure 3.15 (b) Speech Signal x (n) of 10 msec and its DFT retort ....................49
Figure 3.16 Mel frequency scale .....................................................................50
Figure 3.17 (a) Mel Frequency Filters Banks Sample .......................................51
Figure 3.17 (b) Speech Signal placed on Mel frequency filters banks ..............51
Figure 3.18 (a) Prior to Standardization ............................................................52
Figure 3.18 (b) Subsequent to Standardization ...............................................52
Figure 3.19 (a) Extraction of 13 Mel Coefficients of the first frame ..........................53
Figure 3.19(b) Extraction of 13 Mel Coefficients of the tenth frame ..........................54
Figure 3.20 Spectrogram, its Cepstrogram followed by Liftered Cepstrogram of the first Frame Speech Signal.................................................................54
Figure 3.21 Training Hidden Markov Models .........................................................58
Figure 3.22 Result of HMM for Speaker Verification ..............................................63
Figure 3.23 Result of HMM for Speaker Verification ..............................................64
Figure 3.24 A Biological Neuron ........................................................................67
Figure 3.25 The Interaction of Biological Neurons ................................................68
Figure 3.26 An Artificial Neuron ........................................................................69
Figure 3.27 A Multi-Layered Feed-Forward Neural Network ...............................69
Figure 3.28 The Sigmoid Function ........................................................................71
Figure 3.29 Result of ANN for Speaker Verification..............................................72
Figure 3.30 SVM Classifier ..................................................................................75
Figure 3.31 SVM for Binary Linear Classification ...............................................76
Figure 3.32 Result of SVM for Speaker Verification..............................................77
Figure 3.33 Speaker Verification using WEKA tool..............................................78
Figure 4.1 Dynamics of Pheromone Trail over Time............................................82
Figure 4.2 EER Estimation Graph.........................................................................93
Figure 4.3 32 Gaussians of DET curve ..............................................................95
Figure 4.4 64 Gaussians of DET curve ..............................................................95
Figure 4.5 32 Gaussians of DET curve ..............................................................97
Figure 4.6 64 Gaussians of DET curve ..............................................................97
Figure 4.7 Comparison Study.............................................................................98
Figure 4.8 Result Analysis..................................................................................99
Figure 5.1 Various Phonemes that make up Speech.............................................102
Figure 5.2 Spectrum plot of a 20 ms recording of voiced speech, showing three distinct formant peaks .............................................................103
Figure 5.3 Phonemes represented in three different forms ..................................105
Figure 5.4 Division of Phoneme in two samples .................................................106
Figure 5.5 TI-SV system ....................................................................................107
Figure 5.6 PDF form of a Speech Signal .................................................................110
Figure 5.7 SI-GMM for Indexing .................................................................111
Figure 5.8 GMI Method .................................................................................111
Figure 5.9 Steps involved in Modeling ......................................................113
Figure 5.10 Menu of Speaker Verification System .............................................115
Figure 5.11 Input Speech Signal Selection ....................................................115
Figure 5.12 Result Analysis ............................................................................117
