ACKNOWLEDGEMENTS

I would like to express my deepest appreciation to all those who provided me the possibility to complete the present thesis. I am highly indebted to my research supervisor Dr. Dhurjeti Sarvamangala, Assistant professor, Department of Biotechnology, College of Engineering, GITAM UNIVERSITY for her guidance and constant supervision as well as providing necessary information regarding the research. A person with an amicable and positive disposition, she always made herself available to clarify my doubts despite of her busy schedules. I would also thank her for her patience, motivation, being her first Ph.D. student.

I would like to acknowledge with much appreciation the crucial role of Prof. N. Lakshmana Das, Principal of GITAM institute of science and Prof. T.V Ramana, Dean of Science College, GITAM UNIVERSITY for the useful comments, remarks and engagement through the learning process of this PhD thesis.

I would also like to express my deep gratitude to Prof. S.V. Rajagopal, Head of the Department of Biotechnology, Prof. I. Bhaskar Reddy, Dept. of Biochemistry, GITAM institute of science in contributing stimulating suggestions and encouragement in thesis writing.

I would like to take this opportunity to specially thank the staff members of GIS, Dr. P. Shanmukh Anand, Dr. T. Srinivasan, Dr. B. Veerendra Kumar, Dr. M. Anitha, N. Sai Kishore and all other staff members for their constant support and assistance throughout the research.

Furthermore I would like to acknowledge with much appreciation the crucial role of Prof. K. Lakshmi Prasad, Principal, College of engineering, GITAM University who gave permission to use all required equipment and the necessary material for the research programme.

My sincere gratitude to Dr. T. Sekhar, Head of the Department of Biotechnology, College of engineering, GITAM University for providing me the facilities to carry out the research work at the institute.

I express my sincere thanks to Dr. Sk. Khasim Beebi for her constructive suggestions and Dr. I. Sarat Babu for his useful suggestions in statistical analysis. I would also like to thank other staff members of Dept. of Biotechnology, College of
engineering, GITAM University Prof. K. Aruna Lakshmi, Dr. B. Sarada, Dr. K. Padma Dorothy, Dr. G. Vijaya Lakshmi, Dr. K. Prameela and Ms. K. Anuradha for their encouragement, insightful comments and suggestions. My sincere thanks also goes to K. Sudhakar and K. Bala Durga Devi research scholars, Gitam University for helping me in the practical work.

I specially thank to Prof. P. Ellaiah (Retd. Prof., Dept. of Pharmacy, Andhra University) for his assistance in giving valuable suggestions for thesis documentation and with the statistics used in this report. In particular, I wish to express my gratitude to Dr. Y.L.N Murthy, Head of the Dept. of Organic chemistry, Andhra University, Dr. Sailaja, Prof. of Organic chemistry Dept., Andhra University, Dr. V. Usharani, Lecturer, JNTU, Kakinada and Pharmaceutical science Dept., Andhra University and Vimta labs, Hyderabad for allowing me to carry out the biophysical analytical methods.

The thesis would not have come to a successful completion, without the permission and help I get from my working place Visakha Govt. Degree and P.G College for Women, Visakhapatnam to carry out the bench work of research. For that I thank Mrs. Jyothi madam, Course-coordinator of P.G microbiology and faculty members of P.G Dept. of microbiology.

I would like to express my sincere gratitude to my husband Bavisetty Praveen, daughter B.Sanjana, Mother-in-law B.Vijayalakshmi and my parents Payala Gandhi and Payala Sita and the entire family members for their kind co-operation and encouragement which help me in completion of this thesis.
