ACKNOWLEDGEMENT

This thesis is the last of my key journey in obtaining my Ph.D. This thesis has been kept on track with support and encouragement of numerous people whom I wish to extend my sincere gratitude.

First and foremost, praises and thanks to the God, the almighty, for his blessings throughout my research work.

At this moment of accomplishment, I am highly indebted to a person none other than my supervisor Prof. Vijaya Kerkar, Botany Department, Goa University for the able guidance rendered during period of my research work. I am thankful to her for being patient with me during the course of thesis and most importantly for being a good advisor in every aspect of this work.

I would like to express my deep and sincere gratitude to Dr. S.G. Prabhu Matondkar emeritus scientist, CSIR, NIO-Goa for valuable suggestions and providing facilities during field and laboratory work. His vision, sincerity and motivation have deeply inspired me.

I am grateful to Dr. S. R. Shetye, Former Director NIO and Vice Chancellor of Goa University for keen interest in estuarine studies.

Thanks are due to Dr. S. W. A. Naqvi, Director National Institute of Oceanography, for his encouragement and facilities.

I am grateful to Prof. M. K. Janarthanam, Dean of Life Sciences and Environment, Goa University and Prof. Bernard F. Rodrigues Head of Botany Department for their guidance and encouragement during progress of my thesis work.
I would like to express my gratitude towards Dr. Joquim Goes and Dr. Helga do Rosario Gomes, Lemont Doherty Earth Observatory at Columbia University; Prof. Edward Buskey, University of Texas at Austin; Prof. Collin Roeseler of Bowdoin College, Brunswick, ME and Adjunct Prof. Robert A. Andersen, of Bigelow Laboratory for Ocean Sciences of USA for their valuable insights, help and hands on training.

I was fortunate to receive excellent guidance from Prof. Stephen Bates, Fisheries and Oceans, Canada, specialty on algal culturing.

My heartfelt thanks to Dr. Lisette D'souza, Chief Scientist and Dr. Supriya Tilvi, Scientist from CSIR, NIO-Goa for guiding me for toxin analysis.

I am also grateful to DTP section, CSIR, NIO-Goa for graphic work.

I am also thankful to Data Section of CSIR, NIO-Goa for providing temperature data for comparison purposes.

I would like to extend my special thanks to my friend Gourish Salgaonkar for always being helpful, encouraging me and reminding me of my strengths whenever I was low.

I would like to express my special thanks to Dr. Sanitha Sivadas, Dr. Sushma Parab, Dr. Subhojit Basu, Praveen Singh, Balkrishna Patil, Niyati Hede, Shahin Badesab, Prachi Tirodkar, Analiza Dseouza and Prachi Naik who made this journey easier.

I thank Dr. Pratibha Jalmi Women Scientist, UGC, Department of Botany, Goa University for advice during writing of the thesis.

I acknowledge the funding and support received from various sources such as Space Application Centre Ahmadabad and CSIR New Delhi.
Last but not the least, I would like to pay high regards to my parents mother Mrs. Mohini M. Pednekar and father late Mr. Mohan Pednekar. I am extremely thankful to my husband Mr. Siddesh Dongrekar without his support my work would not have completed and my loving daughter Kamana for their untiring love and understanding. I am indebted to my uncle, aunty, sister-in-law, brothers, mother-in-law and father-in-law for taking care of me and my daughter during this important phase of my life.

Lastly, I am indebted to National Institute of Oceanography (NIO) – CSIR who brought me in the research theme and supported me during this study. It is a wonderful organization and all staff supported me.

Suraksha Pednekar
