

ACKNOWLEDGMENTS

I would like to express my heartily felt thankfulness to all persons, who have been very helpful to me during the period it took me to write this thesis.

First and foremost, I would like to express my deep sense of gratitude and high regards to my advisor and mentor, Dr. Ram Raghubir, Sr.Dy. Dir & Former Head, Div. of Pharmacology Division of Pharmacology, Central Drug Research Institute, Lucknow for giving me the opportunity to pursue research in this novel area that allowed me to explore the frontiers of knowledge in the ways that neither of us could have envisioned when I began this trek their willingness to tackle hard problem and to do so when everyone thinks you're crazy has given me a more valuable graduate experience than I could have possibly imagined. They've inspired me by their ability to see the world for what it should be rather than what it is and their tireless work to make it so. I am deeply grateful to my mentor for giving me the independence to explore my research interests and the guidance to avoid getting lost during my exploration. He is a fabulous advisor; he is sharp, cheery, perceptive, and mindful of the things that truly matter. Dr. Raghubir mentorship has made me a better researcher and a better person. Five years on, I definitely made the right choice.

I am immensely pleased in recording my sincere gratitude to the Director of CDRI: Dr.TK Chakraborty and Dr. Rakesh Tuli, Dr. CM Gupta, Ex Directors of CDRI for giving me opportunity to carry out the present research work at CDRI, Lucknow.

Further, I would also like to express my heartfelt thanks to Dr. C. Nath and Dr. Shailja Bhattacharya for their constant encouragement.

I would like to record my special thanks to my seniors, Namratta and Suresh, for their motivation, encouragement and valued help in understanding the research work and discovering new opportunities. I will always remain grateful to them.

My profound thanks are due to all my lab colleagues; Rishi, Prasuja, Anchal, Abhishek, Vikas, Rajkumar for their constant help, valuable suggestions and co-operation throughout the course of study.

I am pleased to extend my thanks to Mrs. Sheeba Saji Samuel, Mr. VS Nigam, Mrs. TL Seth and Mr. CP Pandey for their kind help and support. I also want to convey

my thanks to Mr. GP Singh, Mr. Varun Pathak, Mr. Shailendra Mohan, and Mr. Kishan Mishra for their timely help.

My special thanks goes to Konica Gupta, Anup, Neetu, Gaurav, Namrata, Arunab for giving me light moments in the hustle and bustle of everyday life and ridiculing me out of my daily morning grumpiness.

Outside of the lab, plenty of people kept me sane and happy in Lucknow. There is no other way to express my deep sense of gratefulness to Bajaj, Bhaskar, Subir, Prasad, Shweta, Sonal and Suvarna for being my dependable true friend. Their immense enthusiastic support, encouragements and upliftment is treasured. Thanks for always seeing the best in me.

I acknowledge and appreciate CSIR-HRD New Delhi, for providing the financial assistance in the form of JRF and SRF during my thesis work.

Above all, I am greatly indebted and appreciate very much to my beloved wife, Vibha for her encouragement, support and sacrifices through out the study. Her cheerful attitude in life often made the sky look brighter than it actually was further she goes out of her way to make things better for me. Thank you for bearing my bad temper after bad results. You, together with our son Shivendra, are the most valuable thing in my life.

I do not find suitable words to acknowledge the inspiration and moral support provided by my parents, sister and brothers, who always sacrificed their comforts to stand solidly by me during this long period. Everything I am I owe to them and spending time at home with all of them is the sweetest thing in the world to me.

Last of all but not the least I owe greatly to silent sacrifice of Sprague-Dawley rats.

Nilendra Singh
