ACKNOWLEDGEMENTS

I feel privileged but inadequate to express my profound sense of gratitude and indebtedness towards my brother, sister-in-law, friends and all my teachers of the present and past, who deserve the entire credit of all my insignificant accomplishments.

I am thankful to my teacher Dr. G.D. Gupta, M.S., D.O.M.S., Associate Professor & Head of the Department of Ophthalmology, M.L.B. Medical College, Jhansi, who permitted me to work in the department. His kind and inspiring supervision and expert guidance, invaluable help and advice helped me a lot in completing this thesis work.

It is with an overwhelming sense of gratitude that I wish to express my sincere thanks to my guide Dr. B.S. Jain, M.S., Assistant Professor, Department of Ophthalmology, M.L.B. Medical College, Jhansi, who suggested such an interesting topic for my thesis work. He, a doyen of knowledge and wisdom, has always remained a source of inspiration to me. I feel incapable to express his affectionate and paternal attitude in taking me out of problems whenever I approached even
at the odd moments of his most busy schedule. Words are really inadequate to express my indebtedness for his going through whole of the manuscript and supervising me with valuable and wide suggestions.

I am also thankful to my Co-guide, Dr. V.K. Misuriya, M.S., Assistant Professor, Department of Ophthalmology, M.L.B. Medical College, Jhansi, for his able guidance, valuable suggestions and encouragement to undertake this work.

In the end, I must thank Mr. K.M. Thomas, for his meticulous care and painstaking labour in preparing a neat and faultless type script of the present work.

Dated: 28-9-92
