Abstract	i - iii
Chapter 1 : Introduction and Review literature	
1.1. Application of biosurfactants: Novel Antimicrobial & Antiadhesive agents.	1-19
1.2. Molecular Genetics of Biosurfactant Synthesis in Microorganisms.	20-47
1.3. Marine <i>Acinetobacter</i> species from coastal marine environments and their preliminary characterization	48-69
1.4. Biology of the genus <i>Brevibacterium</i> .	70-83
Chapter 2 : Isolation of marine <i>Acinetobacter</i> species from coastal marine environments and their preliminary characterization.	84-115
Chapter 3 : Bioemulsifier production by <i>Acinetobacter</i> genospecies.	116-142
Chapter 4 : Screening of marine microorganisms for production of Biosurfactant/Bioemulsifier.	143-171
Chapter 5 : Biosurfactant and bioemulsifier production by <i>Brevibacterium halotolerans</i> BS72.	172-195
Chapter 6 : Applications of biosurfactant produced by <i>Brevibacterium halotolerans</i> BS72 and <i>Pseudomonas aeruginosa</i> BS8.	196-220
Chapter 7 : Significant findings of the work.	221-223
Articles published in peer reviewed journals	224
Manuscripts under preparation	224
Papers presented in Conferences	224
Posters Presented in Conferences	224
Workshops and training courses attended	224
Fellowships awarded during the tenure of Doctoral Research	225
