

LIST OF PLATES

Plates	Title	Page No
Plates 2.1	Biochemical reactions of a typical <i>E. coli</i> isolate	100
Plate 2.2	Antibiotic sensitivity pattern of <i>E. coli</i> isolates	100
Plate: 3.1	Colony characteristics of <i>Salmonella</i> on selective and differential medium	139
Plate 3.2.	SIM medium, TSI and Citrate utilization reaction of <i>Salmonella enterica</i> serovar Typhimurium and <i>Salmonella enterica</i> serovar Typhi	140
Plate 3.4	MDR <i>Salmonella</i> serovars	140
Plate 4.1	Nephage1 plaques on NA overlaid with soft agar seeded with <i>Salmonella</i> and lysate	162
Plate 4.2	Nephage1 on <i>Salmonella</i> seeded Agar plate (Spot on Lawn method)	162
Plate 4.3	Electron micrographs of Myoviridae (Nephage 1) showing details of head and tail structure	163
Plate 4.4	Electron micrographs of Siphoviridae (Nephage 2) Head and tail structure	163
Plate 5. 1	Photomicrograph of <i>Bacillus subtilis</i> KBB	217
Plate 5.2a	Bioactivity of <i>Bacillus subtilis</i> KBB against <i>Salmonella</i> (Agar disc method and Spot on lawn method)	217
Plate 5.2b	Bioactivity of culture supernatant of <i>Bacillus subtilis</i> KBB (Agar well diffusion method)	217
Plate 5.3	Bioactivity of purified antimicrobial compound of <i>Bacillus subtilis</i> KBB	218
	a. Single spot in TLC visualized with Ninhydrin	218
13	b. TLC bioautography	218
