

LIST OF FIGURES

Figure No.	Description	Page
CHAPTER III		
3.1	Mean body weights of body from three study groups	48
3.2	Mean heights of boys from three study groups	52
3.3	Mean triceps skinfold thickness values for boys from three study groups	55
3.4	Mean chest circumference values for boys from three study groups	58
3.5	Comparison of mean weights with NCHS standard	60
3.6	Comparison of mean weights with ICMR standard	62
3.7	Comparison of mean heights with NCHS standard	63
3.8	Comparison of mean heights with ICMR standard	65
3.9	Comparison of mean triceps skinkold thickness values with American standard	66
3.10	Comparison of mean triceps skinfold thickness values with Indian standard	68
3.11	Comparison of mean chest circumference values with Harvard standard	69
3.12	Comparison of mean chest circumference values with Indian Standard	71
3.13	Mean body mass index of boys from three study groups	80

Figure No.	Description	Page
3.14	Comparison of mean body mass index with with American standard	81
3.15	Body fat percent in three study groups	89
3.16	Velocity curves	91
3.17	Velocity curves (height) for better off and malnourished children	100

CHAPTER IV

4.1	Logistic model fitted to mean heights of boys.	140
4.2	PBI model fitted to mean heights of boys	148
4.3	PBI model fitted to mean heights of normal boys.	159
4.4	PBI model fitted to mean heights of underweight and stunted boys.	160
