

ACKNOWLEDGEMENT

Present work is an outcome of help given to me by many authorities, colleagues and friends. It is my pleasant duty to express sincere acknowledgements to all of them.

I am deeply indebted to my Guide, Dr. Shobha Rao for her valuable guidance, and keen interest in this project.

I am also extremely thankful to Indian Council of Medical Research for awarding Senior Research Fellowship to me, because of which the present work could be carried out.

I take this opportunity to express my deep sense of gratitude to Dr. A. D. Agate, Director of Agharkar Research Institute, (Formerly known as Maharashtra Association of Cultivation of Science Research Institute) Pune, for providing me facilities to conduct this study.

My personal thanks are to my colleagues Mrs. Avanti Rao, Mrs. Kanade, Mrs. Joshi, Mrs. Malegaonkar, Miss. Chamanalli and other staff members for giving valuable help in collecting the data.

I am also grateful to the authorities of Pune Vidyarthi Griha, Modern High School and Karnatak High School for giving

their excellent co-operation while recording the long term anthropometric and diet survey data used in this study.

Lastly, I would be failing in my duty if I do not thank my family members for their encouragement and full support, without which it was impossible to carry out the present study.
