CHAPTER-I  INTRODUCTION

1.1   General description about graphite                   1
1.2   History of the graphite                              4
1.3   Formation of the graphite                            7
1.4   Impurities present from the Esternghat mobile belt   9
1.4.1  The khondalite group of rocks                       9
1.4.2  The leptynite group of rocks                        10
1.4.3  The quartzites group of rocks                       11
1.4.4  Calc–granulites group of rocks                     11
1.4.5  Charnockites group of rocks                        11
1.4.6  Pink granites group of rocks                        12
1.4.7  Granite gneisses group of rocks                     12
1.4.8  Hypersthene granite gneisses group of rocks        13
1.4.9  Quartz veins and pegmatites group of rocks          13
1.4.10  Migmatites group of rocks                         14
1.5   Uses of graphite                                     14
1.5.1  Special uses                                       15
1.6   Scope of the work                                    19
1.7.1  Objectives of the work                             19
CHAPTER-II  DETAILED GEO DESCRIPTION OF THE GEOLOGICAL REGION OF THE STUDY AREA

2.1  Geographical region of the study area:  
2.A  Location map of Easternghats, India  
2.B  Geographical region map of Vizianagaram  
2.C  Geographical region map of Visakhapatnam  
2.D  Geographical region map of East Godavari  
2.E  Geographical region map of Khammam  
2.F  Legend for geological maps

2.2  Imagery study

2.2.1  First phase deformation (f1-s1-l1)

2.G  Lineament map of the study area

2.H  Contour Images of the study area

2.2.2  Figure Legends

2.2.3  Second phase deformation (f2-s2-l2)

2.2.4  Third phase deformation (f3-s3-l3)

2.2.5  Interrelationship

2.3  Tectonic history

2.4  Geotectonism

2.5  Geological reconstruction of the Khondalite series of Easternghats from earlier Literature

CHAPTER-III  EXPERIMENTAL INVESTIGATION

3.1  Collection of samples

3.2  Laboratory studies

3.2.1  Perographic studies

3.2.2  X-ray Diffraction

3.2.3  Differential thermal analysis studies
3.2.4 Major elemental analysis 64
3.2.5 Minor and trace elemental analysis 64
3.3 Graphite Processing 66
3.3.1 Processing methodology 66
3.3.2 Various stages of processing 67
3.4 Flotation process 68
3.4.1 Flotation reagents 69
3.4.2 Flotation experiments of Graphite 70
3.5 Summary 71

CHAPTER IV MINERALOGICAL CHARACTERISATION OF GRAPHITE FROM DIFFERENT LOCATIONS

4.1 Mineralogical correspondence between graphites of different locations 74
4.2 Mineralogical characterization of graphite 75
4.2.1 Microscopic studies 75
4.2.2 X-ray diffraction studies 78
4.2.3 Differential thermal analysis of graphite 79
4.4 X-Ray diffractograms of Graphites Wolframite 81
4.8 DTA Curves of Graphites Scheelite 82
4.4.3 Temperature Vs Co Parameter Plot 83
4.4.4 Chemical analysis of graphite minerals 87
4.3 Studies on tungsten minerals 88
4.3.1 Wolframite 88
4.3.1.1 Optical studies on wolframite 88
4.3.1.2 X-Ray study of wolframite 89
4.3.1.3 Chemical analysis of wolframite 89
4.3.2 Scheelite 92
4.3.2.1 Opticle studies of scheelite 92
4.3.2.2 XRD study of Scheelite 93
4.3.2.3 Chemical analysis of scheelite 93
4.4 New minerals identified by the present study 96
4.4.1 Umohoite minerals 96
4.4.2 Irarsite mineral 96
4.4.3 Tritomite mineral 97
4.4.4 Pseudobrookite mineral 97
4.4.5 Knebelite mineral 97
4.4.6 Molybdite mineral 98
4.5 Summary 98

CHAPTER-V EFFECT OF PARTICLE SIZE ON GRAPHITE CONTENT IN DIFFERENT FRACTIONS OF ORE:

5.1 Graphite processing 99
5.1.1 Vizianagaram geographical region: 100
5.1.2 Visakhapatnam geographical region: 104
5.1.3 East godavari geographical region 108
5.1.4 Khammam geographical region 111
5.2 Summary 116

CHAPTER-VI TRACE ELEMENT STUDY OF GRAPHITE

6.1 Lithium, rubidium, cesium 119
6.2 Beryllium 120
6.3 Strontium, barium 120
6.4 Zinc, cadmium 121
6.5 Boron 122
CHAPTER VII RELATIONSHIP BETWEEN TRACE ELEMENT PARTICLE SIZE AND GRAPHITE CONTENT

7.1 Refining of graphite
7.2 Flotation materials in different combinations
7A Recovery of Graphite flow sheet
7.3 Recovery of Tungsten mineral
7.4 Effect of increased graphite content in the process ore
7.5 Index Trace element geochemistry in correlation with grade of carbon content:
7.6 Effect of Disposal on gangue material
7.7 Summary

CHAPTER VIII CONCLUSIONS
