

TABLE OF CONTENTS

1. INTRODUCTION	1-58
General Introduction to Catalysis	1
1.1 Catalysis by Polyoxometalates for Clean Organic Synthesis	11
1.2 History of heteropolyoxometalates	15
1.3 Nomenclature in Heteropolyoxometalates	16
1.4 Classification of heteropoly compounds	18
1.5 Structure of Keggin heteropoly compounds	19
1.5.1 Primary Structure	19
1.5.2 Secondary Structure	19
1.5.3 Tertiary Structure	20
1.6 General properties of Keggin Heteropoly compounds	20
1.7 Synthesis of heteropoly compounds	25
1.8 Catalytic activity of heteropoly compounds	27
1.8.1 Acid catalysis in heteropolyacids	28
1.8.2 Applications as acid catalysts	31
1.8.2.1 Heteropolyacids for homogeneous liquid-phase acid catalyzed reaction	31
1.8.2.2 Heteropolyacids as heterogeneous catalysts	34
1.8.3 Heteropoly compounds in oxidation catalysis	36
1.8.3.1 Oxidation with molecular oxygen	39
1.8.3.2 Oxidation by hydrogen peroxide	43
1.8.3.3 Oxidation with tertiary butyl hydroperoxide and others.	49
1.9 General Applications	51
1.10 References	54

2.0	Oxidation of aliphatic and benzylic alcohols by Oxone[®], catalyzed by 12-tungstocobaltate (II)	59-75
2.1	Introduction	59
2.2	Experimental	64
2.3	Present work	66
2.4	Results and Discussion	68
2.5	Conclusions	71
2.6	References	73
3.0	Poly(vinyl) alcohol supported 12-tungstocobaltate (II) as a novel promising heterogeneous catalyst for the oxidation of benzylic alcohols.	76-97
3.1	Introduction	76
3.2	Experimental	83
3.3	Present Work	84
3.4	Results and Discussion	85
3.5	Conclusions	89
3.6	References	96
4.0	Catalytic activity of Anderson-type: sodium hexamolybdochromate (III) in alcohol oxidations by hydrogen peroxide	98-113
4.1	Introduction	98
4.2	Present Work	102
4.3	Experimental	103
4.4	Results and Discussion	104
4.5	Conclusions	107
4.6	References	110

5.0	Multi component reactions (MCRs): biginelli 3,4 dihydropyrimidin-2(1<i>H</i>)-ones synthesis catalyzed by 11-molybdo-1-vanadophosphoric acid (H₄PMo₁₁VO₄₀)	114-145
5.1	Introduction	114
5.2	Present Work	127
5.3	Experimental	129
5.4	Results and Discussion	130
5.5	Spectra	133
5.6	Conclusions	137
5.7	References	141
6.0	(Salen)chromium(III) complex catalyzed oxidation benzylic alcohols by Oxone®	146-162
6.1	Introduction	146
6.2	Present Work	153
6.3	Experimental	154
6.4	Results and Discussion	156
6.5	Conclusions	158
6.6	References	160
7.0	Synthesis of β-hydroxyl ketones in water: A green protocol under metal-free conditions	163-196
7.1	Introduction	163
7.2	Present Work	181
7.3	Experimental	183
7.4	Results and Discussion	184
7.5	Spectra	186
7.6	Conclusions	190
7.6	References	193
	SUMMARY AND CONCLUSIONS	197-202
