| TITLE   | PAGE.NO. |
|---|----------|
| Declaration   | I        |
| Certificate   | II       |
| Acknowledgement   | III      |
| General Remarks   | V        |
| Synopsis  |          |
| <b>PART A : Synthesis of <math>\beta</math>-Lactam Antibiotics.</b>                                     |          |
| <b>CHAPTER I : A Brief Review on <math>\beta</math>-Lactam Antibiotics.</b>                             |          |
| Introduction  |          |
| Penicillins   |          |
| Cephalosporins  |          |
| Biological activity of $\beta$ -lactam antibiotics  |          |
| References  |          |
| <b>CHAPTER II : Synthesis of Cyanuric Chloride Derivatives.</b>   |          |
| Abstract  |          |
| Introduction  |          |
| Results and Discussion  |          |
| Experimental  |          |
| References  |          |
| <b>CHAPTER III: Synthesis of Cyanuric Chloride Derivatives of <math>\beta</math>-Lactam Antibiotics</b> |          |
| Introduction  |          |
| Results and Discussion  |          |
| i) Synthesis of cyanuric chloride derivatives of penicillins  |          |
| Abstract  |          |
| Experimental  |          |

ii> Synthesis of cyanuric chloride derivatives of cephalosporins

Abstract

Experimental

iii> In vitro anti-bacterial activity of cyanuric chloride derivatives of  $\beta$ -lactam antibiotics

Abstract

Results and Discussion

Experimental

References.

**PART B : Synthetic Uses Of Silazanes**

**CHAPTER I : A Brief Review On Silylation Reaction.**

**CHAPTER II : Lead Nitrate Catalyzed Silylation Using Silazanes**

Introduction

Results and Discussion

i> Protection of hydroxy and carboxylic group using hexamethyldisilazane (HMDS) catalyzed by lead nitrate

Abstract

Experimental

ii> Hexamethylcyclotrisilazane (HMCTS) as a divalent silylation agent for aminophenols and aminoacids

Abstract

Experimental

References
